INSTRUCTION MANUAL

LE75B9300U

Please read this manual carefully before operating the unit,and keep it for future reference.

Contents

01 Safety warnings

WELCOME

Thanks for buying this 75" LED LCD TV.This guide will help you set up and begin using your TV.

First, check the contents of your box with the parts check list below:

> 75" UHD Digital LED LCD TV
> Remote control
> AAA battery x2
> Instruction Manual
> Warranty Card
> Screws
> Stand
> AV adaptor cable
> YPbPr adaptor cable

Now you can get started!

IMPORTANT INFORMATION

READ ALL INSTRUCTIONS BEFORE USE AND KEEP FOR FUTURE REFERENCE.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK).NO USER SERVICEABLE PARTS INSIDE. FOR ANY PROBLEMS, REFER SERVICING TO THE CUSTOMER HELP LINE. THERE IS A LIGHTNING ARROW SYMBOL IN THE TRIANGLE: THIS SYMBOL INDICATES HIGH VOLTAGE IS PRESENT INSIDE. IT IS DANGEROUS TO MAKE ANY KIND OF CONTACT WITH ANYINSIDE PART OF THIS PRODUCT.

THERE IS A EXCLAMATION MARK IN THE TRIANGLE: THIS SYMBOL ALERTS YOU THAT IMPORTANT LITERATURE

CONCERNING OPERATION AND MAINTENANCE HAS BEEN INCLUDED WITH THIS PRODUCT.

CAUTION:TO REDUCE THE RISK OF ELECTRIC SHOCK AND FIRE, DO NOT PUT THE TV SET NEAR SOURCES OF HUMIDITY. DO NOT USE ANY ABRASIVE CLEANERS WHICH MAY SCRATCH OR DAMAGE THE LCD SCREEN. AVOID CONTACT WITH OBJECTS THAT MAY SCRATCH THE LCD SCREEN.

NOTE: SERVICING THE UNIT YOURSELF IS UNAUTHORISED AND COULD LEAD TO INJURY OR PRODUCT DAMAGE. REFER ALL SERVICING TO THE CUSTOMER HELPLINE.

Safety notice

- Warning: To reduce the risk of electric shock, do not remove the cover or back. There are no user-serviceable parts inside. Refer servicing to qualified personnel.

- Warning: To prevent fire or electric shock hazard, do not expose the unit to rain or moisture.

- Do not expose the product to water (dripping or splashing) and no objects filled with liquids, such as vases, should be placed on the unit.

- Keep the product away from direct sunlight and heat source such as radiators or stoves.

- Do not block the ventilation openings. Slots and openings on the unit are provided for ventilation. The openings should never be blocked by placing your product on a cushion, sofa or other similar surface.

- Do not place the product on unstable cart, stand, tripod, bracket or table. The unit may fall, resulting in possible damage or injury.

- Never place heavy or sharp objects on the panel or frame.

- Unplug the Power from the outlet when the unit is not in use.

- Attention should be drawn to the environmental aspects of battery disposal.

- WARNING: The battery shall not be exposed to excessive heat such as sunshine, fire or the like.

- WARNING: Excessive sound pressure from earphones or headphones can cause hearing loss.

- CAUTION:When the apparatus was in electrostatic circumstance, it maybe malfunction and need to reset by user.

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

WARNING AND CAUTIONS
Warning

High voltages are used in the operation of this television receiver. Do not remove the cabinet back from your set. Refer servicing to qualified service personnel.
Warning

To prevent fire or electrical shock hazard, do not expose the television receiver to rain or moisture.
Warning

Do not drop or push objects into the television cabinet slots or openings. Never spill any kind of liquid on the television receiver.

Caution

Do not block the ventilation holes in the back cover. Adequate ventilation is essential to prevent failure of electrical components.

Caution

Do not trap the power supply cord under the television receiver.

Caution

Never stand on, lean on, or suddenly push the television or its stand. You should pay special attention to children. Serious injury may result if it should fall.

Caution

Do not place your television on an unstable cart, stand, shelf or table. Serious injury to an individual , and damage to the television, may result if it should fall.
Caution

When the television receiver is not used for an extended period of time, it is advisable to disconnect the AC power cord from the AC outlet.

Minimum distances
10cm 10cm 5cm
20cm

Caution

If the television is to be built into a compartment or similar enclosure, the minimum distances must be maintained. Heat build-up can reduce the service life of your television, and can also be dangerous.

En

02 Introdution

CAUTION

Never tamper with any components inside the TV, or any other adjustment controls not described in this manual. All LED-TV's are high voltage electrical equipment.
When you clean dust or any water drops off the SCREEN or CABINET or around any of the buttons or connectors, the power cabled should be removed from the power socket. Wipe the TV with a soft, dry, dust free cloth.
During thunderstorms, unplug the power cable and aerial / antenna cable to prevent damage to your TV and any other devices connected to it.
All repairs to this TV should only be performed by qualified TV service
personnel.

Main features

① Used as Television, display terminal；

② High luminance, wide viewingangle；

③ HDMI interface ；

INSTALLATION

*Locate the TV in the room where light does not strike the screen directly.
*Total darkness or a reflection on the picture screen can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing.
*Allow enough space between the TV and the wall to permit ventilation.
*Avoid excessively warm locations to prevent possible damage to the cabinet or premature component failure.
*Do not cover the ventilation openings when using theTV.

④ NICAM；

⑤ Time-shift；

Base Stand Assembly Instruction

1 Place TV unit face down on a soft and flat surface (blanket, foam, cloth, etc.) to prevent any damage to the TV.
2 Position the TV stand with the curved bracket facing the front of the TV.

Pls ensure that the legs of the TV stand are pointed outward with and with the longer leg pointed toward the front of the TV.

3 Attach the TV stand to the bottom of the TV with the eight MB6 (26mm) black screws.
✐ INSTALLATION NOTES

Locate the TV in a room where light does not strike the screen directly. Total darkness or a reflection on the screen can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing.

Allow enough space between the TV and the wall to permit ventilation.

Please do not attempt to rotate the TV on the stand.

Avoid excessively warm locations to prevent possible damage to the cabinet or premature component failure.
WALL MOUNTING INSTALLATION GUIDELINES

This television can be wall mounted as follows:

1.Use the four screws provided to fix the TV onto a wall mounting bracket (not included) via the four VESA standard holes on the back of the television.

Connecting to your Haier TV

Connecting a DVD player / Satellite / cable set top box receiver / games console / PC or Laptop

There are several options to connecting a DVD player / Satellite or Cable set top box receiver / games console / PC or Laptop to your TV.

Option 1 **HDMI**

1 If the device you want to connect to the TV is switched on, switch off the device first.
2 Connect a HDMI cable (not supplied) from the HDMI socket on the TV to the DVD player / Satellite or cable receiver or games consol.
3 Switch on the device you have just connected to the TV
4 To select the device connected with the HDMI cable press the **SOURCE** button on the remote and use the ▼▲keys to select **HDMI** and press the **OK** button.

Option 2 **AV Audio Visual**

(Yellow/White/Red)
1 Make sure that both TV and the device are switched off before connectin g.
2 Connect the AV cables (not supplied) from the Video (yellow) and Audio (white, red) sockets on the TV to the DVD player or games console etc.
3 To select the device connected with the AV cable press the SOURCE button on the remote and use the ▼▲keys to select AV and press the OK button.

Option 3 **YPbPr**
(Green/Blue/Red)+(White/Red)

1 Make sure that both TV and the device are switched off before connecting.

2 Connect the cables (not supplied) from the YPbPr IN sockets Y, Pb, Pr (green, blue, red) and L-Audio-R (white, red) on the TV to the DVD player or games console etc.

3 To select the device connected with the YPbPr cable press the SOURCE button on the remote and use the ▼ ▲ keys to select YPbPr and press the **OK** button.

Option 4 **USB**

1 Most USB sticks can be connected to your TV and some digital cameras may also work.
2 Connect USB stick (not supplied) or a USB cable (not supplied) to the TV.
3 To select the USB device connected to the TV, press the SOURCE button on the remote and use the ▼▲keys to select USB and press the **OK** button.

Note1:Only *.jpg , *.mp3 , *.txt , *.avi ,*.mp4 , files will work, other file types are not guaranteed and may not.

Note 2. Apple iPhones and iPods are not compatible with your TV.

Note 3. When connecting any device to the USB connection, keep the USB cable length as short as possible.

En

Option 5 **HEADPHONE OUTPUT**

Insert the plug of the earphone into the headphone socket on the TV. The TV speakers are now muted. Alternatively you can also plug in external speakers if required.

Option 6 **DIGITAL AUDIO OUT(OPTICAL)**

OPTICALL is a digital audio connection used to connect audio equipment, for example home theatres and other digi tal HiFi systems over short distances. The signal is transmitted over either a coaxial cable with RCA connectors.
1 Make sure that both TV and the device are switched off before connecting.
2 Connect the AV cables (not supplied) from the OPTICAL socket on the TV to the Home Theater sound system or digital HiFi system etc.

COMMON INTERFACE

The common interface (CI) slot is designed to accept the conditional Access (CA) Module and Smart card in order to view the pay TV programmes and additional services.
Contact your Common Interface service provider to get more information about the modules and subscription.
Please noted that CA modules and smart cards are neither supplied nor optional accessories from us.

🔎 **Warning**

- Switch off your TV before any module is inserted in the Common Interface slot.

1 Insert the CAM correctly, then Smart Card to the CI slot that is located at the side of the TV.

CI Slot
CAM
Smart Card
2 Turn on the TV and it will display the below message if the CI module is detected. Wait for few moments until the card is activated.
CI Module Inserted

3 Detailed information on the CI card in use is displayed.

4 Press **OK** button to access the card menu. Refer to the module instruction manual for setting details.

5 When module is removed, the following message will appear on the screen.

CI Module Removed

03 Remote Control

#	Button	Descriptions

05 Trouble shooting

Trouble phenomenon Symptom		Inspection Check
Picture	**Audio**	
Snow	Noise	antenna position, direction or connection
Ghost	Normal audio	antenna position, direction or connection
Interference	Noise	electronic equipment,car/ motorcycle,fluorescent light
Normal Picture	Mute	Volume(check if mute is activated or if the audio system connections are not correct)
No picture	Mute	Power cord is not inserted Power switch is not opened Contrast and brightness/volume setup Press standby key on the remote control for inspecting
No colour	Normal audio	Colour control
Picture breaking up	Normal audio or weak	retune channel
No colour	Noise	TVsystem
There is black bar on top and bottom	Normal audio	Change aspect to zoom

En

Trouble Shooting

My TV does not display the picture on my laptop / PC when connected.	Most PC's and laptops when connected with a VGA Plug (the blue 15 pin plug on your PC or laptop) require you to press some buttons on your key board to get a picture on a TV or other external display. This is usually the F7 (Dell) or F4 (HP / Samsung) or F5 (Toshiba). On laptops, you have to press the "Fn" key at the same time as the "F" key.
I have connected my PC/Laptop to the TV and get a picture but no sound. Why ?	The VGA cable only carries the video or picture information. You need to connect a separate cable connected to the earphone socket (3.5mm jack) on you PC/Laptop to the 3.5m (PC Audio IN) socket on your TV. You will need to select "PC" using the Source button on your remote. Alternatively connect your PC/Laptop using a HDMI cable if you PC/Laptop has a HDMI connector. HDMI is both audio and video.
The picture is not auto resizing when changing channels.	Check that the TV picture Aspect Ratio is set to 'Auto' on all inputs ATV, DTV, SCART, HDMI To set the aspect ratio, (Auto, 4:3 or 16:9). Press Source button start at ATV and repeat the sequence below for all input sources ATV, DTV, SCART, HDMI as each input source is controlled separately. Press TV Menu button Press Right Arrow to access Picture sub menu Press Down Arrow to select Aspect Ratio Select Auto Press Exit Repeat for all input sources.
I have just plugged in a DVD player or another item into my TV and it doesn't work.	This is applicable to any item of equipment plugged to the TV 1. Turn both TV & DVD player off (plugs out of the wall socket, not standby). 2. Turn off any equipment connected to the SCART socket. 3. Disconnect the SCART plug from the TV. 4. Plug in and turn TV on 5. Plug in and turn DVD player on 6. Select HDMI from Source Menu 7. Press play on DVD player and check movie plays ok NOTE: The SCART socket has priority over HDMI and it is important that the equipment connected to the SCART socket on the TV is switched OFF (not in standby). Please follow this information. If the advice works and the DVD player works, the TV is OK it is just a bit confused. Probably HDMI plugs have been removed and plugged back in when the TV is switched on. Never remove or plug in HDMI cables or any digital equipment with the equipment switched on. Always switch off all equipment when unplugging or connecting any digital equipment.

Trouble Shooting Digital TV Problems and possible Solutions.

Picture Breaks into Pixels

A typical example of a reception problem includes the **break up of pictures** (pixilation) or the **picture freezing**, sometimes there are **clicking or squeaking** sounds or the **sound drops out** or there is **NO reception** at all. Your picture may break into pixels due to the digital video signal dropping. The signal dropping may occur because of either problems with weak signals (see TV Aerials) or if you are connected by cable a weak cable signal. If the problem is weak signals, use an amplifier to strengthen the signal. A cable technician can help you install an inline amplifier or a pre-amplifier. This will boost your signal strength and fix the pixel problem.

If you are receiving your TV signal by satellite, check your dish has not moved following high winds, or that the signal is blocked by trees. Trees can be a problem as the TV signal can change depending if a tree between the satellite dish and satellite is in bare or in full leaf.

Missing channels

It may be that you find that there are **channels missing**, or you're receiving channels from the wrong region. Sometimes the i**nteractive services (red button) doesn't work**. This is usually caused by weak signal, see TV Aerials

TV Aerials

Digital terrestrial television (Freeview) comes to your TV via an aerial, The old aerial that was good for analogue TV may not work well for digital so may need upgrading. If you are getting some but not all of the digital channels on DTV (Freeview) for example you get BBC1, BBC2, Channel 4 ,but not ITV or Channel 5, this is usually because your aerial is a narrow band type, and needs to be changed to a wide band type.

Faulty Leads and Cables

Check your TV. Are the leads at the back - to the mains, the aerial, the set-top box, the video or DVD player or recorder properly connected? SCART leads are known to work loose over time and can result in both audio and video (picture) problems. Either left or right or both audio is missing and the colours are poor or muddy looking. Push the SCART plugs firmly in, this should fix the problem.
HDMI plugs need to be pushed in firmly; it's only the last millimetre that the contacts make. Typically the black plastic part of the HDMI plug should be very close or touching the body of the TV or component.
When plugging in any HDMI cables you may experience problems if the HDMI cables are plugged in when the TV or the other component is switched on. Always switch off both the TV and the component you are plugging in. If you have checked the plugs and sockets, switch off the TV and whatever you have plugged in to the TV and then switch them on again.

I have connected my PC to the TV. There is no sound.

If you connect your PC or Laptop to the TV using a VGA (15 pin Sub D) cable there is no audio, you need to connect a separate audio cable to the TV from the PC or laptop.

Unnatural Colours and Flesh Tones

Unnatural flesh tones and other colours could present another problem even in a new HDTV. This is due to the TV picture settings, which are optimized for a showroom environment. Fix this by changing the picture mode to natural in the picture menu. For more precision, try manually setting the colour, contrast and brightness options in the picture menu.

White Outlines

White outlines around objects and people generally appear either if the TV sharpness is set to very high, or if your television set uses some edge-enhancement processing technology. Go to the picture menu and adjust the sharpness till the white outline disappears. If edge-enhancement is enabled, try to disable it using the service menu.

Choppy Video

At times the video might become choppy. When this happens, check whether the signal is strong enough. If the signal is strong the problem is with the cable operator. If the signal strength is weak, try boosting the signal strength with the help of an amplifier.

The picture does not fill the screen

When connecting PC's or laptops to the TV, the picture may not fill the screen. Check the display settings on your PC or laptop (Windows > Start > Control Panel > Appearance and Personalization > Display settings) and select the best resolution. On your TV select:- TV Menu > Picture > Settings and then try AUTO, ZOOM1 or ZOOM2 for the best display.

USB Connection

The USB connection will work with *.jpg (photo) and *.mp3 (music) files. Please note the TV does not recognize Apple iPhone, or iPod's connected to the USB connector on the TV. The TV may play other files, but due to the multiple different file formats, there is no guarantee that these other file formats will work.
