Safety precautions

Using your ASUS Transformer Book Trio

This ASUS Transformer Book Trio should only be used in environments with ambient temperatures between 5°C (41°F) and 35°C (95°F).

Refer to the rating label on the bottom of your ASUS Transformer Book Trio and ensure that your power adapter complies with this rating.

Do not leave your ASUS Transformer Book Trio on your lap or near any part of your body to prevent discomfort or injury from heat exposure.

Do not use damaged power cords, accessories, and other peripherals with your ASUS Transformer Book Trio.

While powered on, ensure that you do not carry or cover your ASUS Transformer Book Trio with any materials that can reduce air circulation.

Do not place your ASUS Transformer Book Trio on uneven or unstable work surfaces.

You can send your ASUS Transformer Book Trio through x-ray machines (used on items placed on conveyor belts), but do not expose them to magnetic detectors and wands.

Contact your airline provider to learn about related in-flight services that can be used and restrictions that must be followed when using your ASUS Transformer Book Trio in-flight.

Caring for your ASUS Transformer Book Trio

Disconnect the AC power and remove the battery pack (if applicable) before cleaning your ASUS Transformer Book Trio. Use a clean cellulose sponge or chamois cloth dampened with a solution of nonabrasive detergent and a few drops of warm water. Remove any extra moisture from your ASUS Transformer Book Trio using a dry cloth.

Do not use strong solvents such as thinners, benzene, or other chemicals on or near your ASUS Transformer Book Trio.

Do not place objects on top of your ASUS Transformer Book Trio.

Do not expose your ASUS Transformer Book Trio to strong magnetic or electrical fields.

Do not use or expose your ASUS Transformer Book Trio near liquids, rain, or moisture.

Do not expose your ASUS Transformer Book Trio to dusty environments.

Do not use your ASUS Transformer Book Trio near gas leaks.

Proper disposal

Do not throw your ASUS Transformer Book Trio in municipal waste. This product has been designed to enable proper reuse of parts and recycling. The symbol of the crossed out wheeled bin indicates that the product (electrical, electronic equipment and mercury-containing button cell battery) should not be placed in municipal waste. Check local regulations for disposal of electronic products.

Do not throw the battery in municipal waste. The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

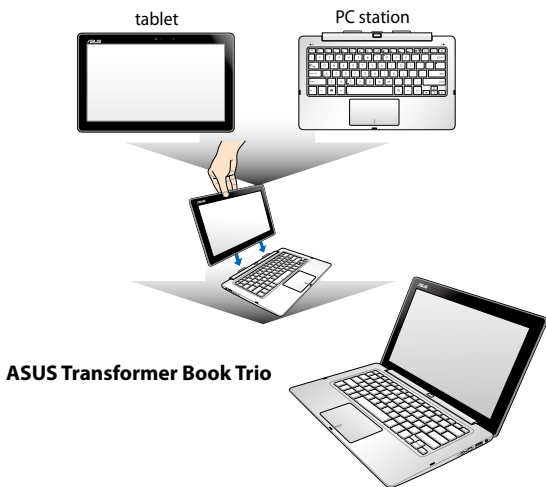

Chapter 1:

Hardware parts

Getting to know your ASUS Transformer Book Trio

Your ASUS Transformer Book Trio is made up of two major devices: the tablet and the PC station. When the tablet is docked on the PC station, both devices can be used as the ASUS Transformer Book Trio.

If the tablet is undocked from the PC station, each can function as individual devices with their own set of features. The tablet contains the Android® operating system while the PC station contains Windows® 8.

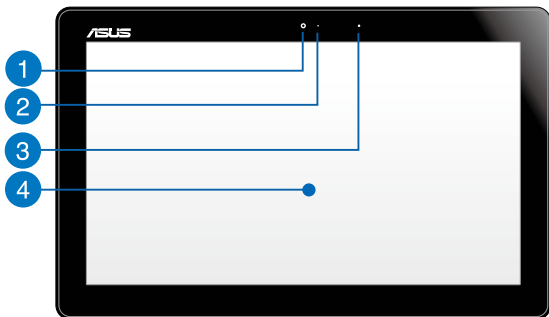

NOTE: For more details on connecting or disconnecting the tablet and the PC station, refer to the *Transforming your devices into an ASUS Transformer Book Trio* and the *Undocking the tablet from the PC station* sections in this manual.

Tablet

The tablet of your ASUS Transformer Book Trio allows you to perform touch screen gestures while working on Windows® 8 or Android®. When detached from the PC station, the tablet can be used to work on Android® only.

Top View

- 1 Camera**
The built-in camera allows you to take pictures or record videos using your ASUS Transformer Book Trio.
- 2 Camera indicator**
The camera indicator lights up when the built-in camera is in use.

3 Ambient light sensor

The ambient light sensor detects the amount of ambient light in your environment. It allows the system to automatically adjust the brightness of the display depending on the ambient light condition.

4 Touch screen panel

This high-definition touch screen panel provides excellent viewing features for photos, videos, and other multimedia files on your ASUS Transformer Book Trio or tablet. It also allows you to operate your tablet using touch gestures.

NOTE: For more details, refer to the *Gestures for the touch screen panel and touchpad* section in this manual.

Ports and slot

1

Headphone output jack port (for Android® only)

This port allows you to connect your ASUS Transformer Book Trio to headphones while working on Android®. You can also use this port to connect your ASUS Transformer Book Trio to an external microphone.

2

PC station slots

These slots are magnetic and align conveniently with the magnetic PC station tabs to securely attach the tablet.

WARNING!

- The PC station tabs are magnetized, please keep them out of children's reach.
 - Magnetic fields generated by mobile devices may damage data on magnetic storage media, such as credit cards, computer discs or tapes. Do not place your device next to such media.
 - Never expose your device to strong magnetic fields as this may cause temporary malfunction.
 - Magnets can affect functioning pacemakers and implanted defibrillators. Refer to your pacemaker or defibrillator's suggested distance from magnets.
-

3 **Micro USB 2.0 port (for Android® only)**

Connect the bundled micro USB to USB adapter into this micro USB (Universal Serial Bus) 2.0 port to charge the battery or supply power to your tablet. You can use this as a charging port while using the tablet as a separate device.

When the tablet is used separately, you may also use this port to facilitate data transfers from an external device.

4 **MicroSD card slot**

This built-in memory card reader slot supports microSD and microSDHC card formats.

NOTE: When working on Windows® 8, you need to ensure that the Android® system is also running.

Rear view

IMPORTANT! Battery time varies by usage and by the specifications for this ASUS Transformer Book Trio. The battery pack cannot be disassembled.

1

Microphone

The built-in microphone can be used for video conferencing, voice narrations, or simple audio recording.

2

Camera (for Android® only)

The built-in camera allows you to take pictures or record videos while working on Android®.

3

Audio speakers

The built-in audio speakers allow you to hear audios straight from your tablet. Audio features are software controlled.

4 **Volume button**

Press this button to increase or decrease the volume.

5 **Power button**

The power button turns on your tablet, boots up Android®, and also resets your tablet when needed. Refer to the following scenarios when using your tablet's power button:

- Press the power button to turn on your tablet and boot up Android®.
- While working on your tablet, you can press the power button to put your tablet to sleep or wake it up from sleep mode.
- In the event that your tablet becomes unresponsive, press and hold the power button for about seven (7) seconds until your tablet shuts down.

PC station

The PC station serves as an input device for your ASUS Transformer Book Trio via its keyboard and touchpad. It also provides access to Windows® 8 when the tablet is docked on it or while using an external display.

Top View

NOTE: The keyboard's layout may vary per model, region, or country.

1 Microphone

The built-in microphone can be used for video conferencing, voice narrations, or simple audio recording.

2 PC station hinge

This hinge allows you to connect the tablet to the PC station. It also holds the tablet in place as you adjust it to different viewing angles.

3 **Tablet release button**

Press this button all the way in until the hinge unlocks the tablet from the PC station.

4 **Power indicator**

The power indicator lights up when the PC station is turned on and running Windows® 8. It also blinks slowly when the PC station is in sleep mode.

5 **Power button**

The power button turns on your PC station, boots up the Windows® 8 system, and also resets your PC station when needed. Refer to the following scenarios when using your PC station's power button:

- Press the power button to turn on your PC station and boot up Windows®8.
- While working on your PC station, you can press the power button to put your PC station to sleep or wake it up from sleep mode.
- In the event that your PC station becomes unresponsive, press and hold the power button for about four (4) seconds until your PC station shuts down.

6 Operating system (OS) switch key

The OS switch key is a special button on the PC station that allows you to conveniently switch between the Windows® 8 and Android® operating systems.

This key only works when the tablet and PC station are connected and used as an ASUS Transformer Book Trio.

NOTE: For more details, refer to the *Using the operating system (OS) switch key* section in this manual.

7 Keyboard

The keyboard provides full-sized QWERTY keys with a comfortable travel depth for typing while working on either Windows® 8 or Android®. It also enables you to use the function keys, allows quick access to Windows®, and controls other multimedia functions.

NOTE: The keyboard layout differs by model or territory.

8 Touchpad

The touchpad allows the use of multi-gestures to navigate onscreen, providing an intuitive user experience while working on Windows® 8 and Android®. It also simulates the functions of a regular mouse.

NOTE: For more details, refer to the *Gestures for the touchpad* section in this manual.

Rear View

1 PC station tabs

The magnetic PC station tabs securely attach the tablet to the PC station.

Attach the tablet to the PC dock by aligning the PC station slots on top of these tabs. Once attached, you can adjust the tablet according to your preferred viewing angle.

WARNING!

- The PC station tabs are magnetic, please keep them out of children's reach.
 - Magnetic fields generated by mobile devices may damage data on magnetic storage media, such as credit cards, computer discs or tapes. Do not place your device next to such media.
 - Never expose your device to strong magnetic fields as this may cause temporary malfunction.
 - Magnets can affect functioning pacemakers and implanted defibrillators. Refer to your pacemaker or defibrillator's suggested distance from magnets.
-

Right Side

NOTE: The following ports can only be used in Windows® 8.

- 1 Micro HDMI port (for Windows® 8 only)**

This port is for the micro HDMI (High-Definition Multimedia Interface) connector and is HDCP compliant for HD DVD, Blu-ray, and other protected content playback.
- 2 Mini DisplayPort port (for Windows® 8 only)**

Use this port to connect your ASUS Transformer Book Trio to a DisplayPort or VGA, DVI, or HDMI external display.

3 USB 3.0 port with USB Charger+* (for Windows® 8 only)

This USB 3.0 port with the ⚡ icon comes with the USB Charger+ feature. USB Charger+ allows you to quick-charge mobile devices and can be used even while your ASUS Transformer Book Trio is on sleep, hibernate, or shutdown mode*.

4 Power (DC) input port (for Windows® 8 only)

Insert the bundled power adapter into this port to charge the battery pack and supply power to your PC station.

When running your ASUS Transformer Book Trio in power adapter mode, both the PC station and tablet's battery can be charged through this port.

WARNING! The adapter may become warm to hot while in use. Ensure not to cover the adapter and keep it away from your body while it is connected to a power source.

IMPORTANT! Use only the bundled power adapter to connect your PC station with a nearby power outlet.

** on selected models only*

Left Side

1 Headphone output/microphone input combo jack port

This port allows you to connect your PC station to amplified speakers or headphones. You can also use this port to connect your PC station to an external microphone.

2 USB 3.0 port (for Windows® 8)

This USB (Universal Serial Bus) 3.0 port provides a transfer rate of up to 5 Gbit/s and is backward compatible to USB 2.0.

USB 2.0 port (for Android®)

This USB (Universal Serial Bus) port is compatible with USB 2.0 or USB 1.1 devices such as keyboards, pointing devices, flash disk drives, external HDDs, speakers, cameras and printers.

3 Status indicators

The status indicators help identify the current hardware status of your PC station.

Power indicator

The power indicator lights up when the PC station is turned on and blinks slowly when the PC station is in sleep mode. It also indicates that Windows® 8 is already booted up.

Two-color battery charge indicator

The two-color LED provides a visual indication of the ASUS Transformer Book Trio's battery charge status. Refer to the **LED Color Table** below for more details.

LED Color Table

Color	Status
Solid Green	The PC station is plugged to a power source, charging its battery, and the battery power is between 95% and 100%.
Solid Orange	<ul style="list-style-type: none">The PC station is plugged to a power source, charging its battery, and the battery power is less than 95%.The tablet is connected to the PC station, charging its battery, and the tablet's battery power is less than 30%.
	<hr/> NOTE: This charging process is automatically enabled even while your system is on sleep mode or turned off. <hr/>
Blinking Orange	The PC station is running on battery mode and the battery power is less than 10%.
Lights off	The PC station is running on battery mode and the battery power is between 10% to 100%.

Drive activity indicator

This indicator lights up when your PC station is accessing the internal storage drives.

Transforming your devices into an ASUS Transformer Book Trio

To use both devices as an ASUS Transformer Book Trio, align the tablet with the PC station tabs as illustrated below.

NOTE: The PC station slots and the PC station tabs contain magnetized parts. The pull between these magnets help align the tablet so that it is properly inserted into the PC station hinge.

Undocking the tablet from the PC station

To use your tablet or PC station as separate devices, undock the tablet from the PC station as shown in the illustration below.

- A. Press the tablet release button to detach the tablet from the PC station.
- B. Pull out the tablet from the PC station hinge.

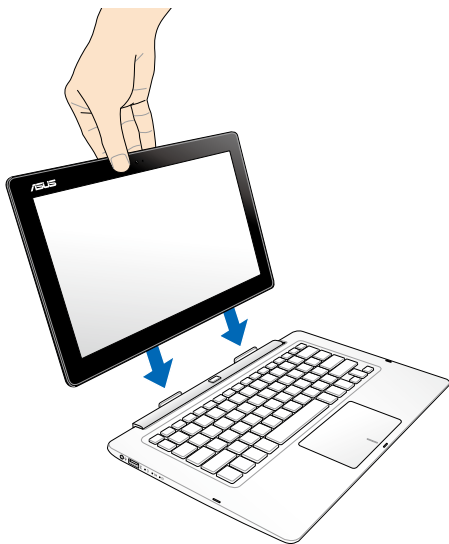

Chapter 2: ***Getting started***

Setting up your device

Using your ASUS Transformer Book Trio

Refer to the following steps when setting up your ASUS Transformer Book Trio.

1. Dock the tablet into the PC station.

2. Charge your ASUS Transformer Book Trio.
 - A. Plug the AC power adapter into a 100V~240V power source.
 - B. Connect the DC power connector into your ASUS Transformer Book Trio's power (DC) input.

Charge the ASUS Transformer Book Trio for **3 hours** before using it in battery mode for the first time.

NOTE: The power adapter may vary in appearance, depending on models and your region.

IMPORTANT!

- Locate the input/output rating label on your ASUS Transformer Book Trio and ensure that it matches the input/output rating information on your power adapter. Some ASUS Transformer Book Trio models may have multiple rating output currents based on the available SKU.
 - Ensure that your ASUS Transformer Book Trio is connected to the power adapter before turning it on for the first time. We strongly recommend that you use a grounded wall socket while using your ASUS Transformer Book Trio on power adapter mode.
 - The socket outlet must be easily accessible and near your ASUS Transformer Book Trio.
 - To disconnect your ASUS Transformer Book Trio from its main power supply, unplug your ASUS Transformer Book Trio from the power socket.
-

NOTE:

Power adapter information:

- Input voltage: 100-240Vac
 - Input frequency: 50-60Hz
 - Rating output current:
PC station: 45W (2.37A)
Tablet: 10W (2A)
 - Rating output voltage:
PC station: 19V
Tablet: 5V
-

WARNING!

Read the following precautions for your ASUS Transformer Book Trio's battery.

- Only ASUS-authorized technicians should remove the battery inside the device.
 - The battery used in this device may present a risk of fire or chemical burn if removed or disassembled.
 - Follow the warning labels for your personal safety.
 - Risk of explosion if battery is replaced by an incorrect type.
 - Do not dispose of in fire.
 - Never attempt to short-circuit your ASUS Transformer Book Trio's battery.
 - Never attempt to disassemble and reassemble the battery.
 - Discontinue usage if leakage is found.
 - The battery and its components must be recycled or disposed of properly.
 - Keep the battery and other small components away from children.
-

3. Press the power button on your PC station.

IMPORTANT! When using your ASUS Transformer Book Trio for the first time, ensure that the device is running on power adapter mode when you press the power button to unlock the BIOS settings.

Using the operating system (OS) switch key

When the tablet and the PC station are used individually, they run using their respective operating systems. But when both devices are connected and used as an ASUS Transformer Book Trio, you can use Android® or Windows® 8 interchangeably using the operating system (OS) switch key.

To guide you through the process of switching between Android® or Windows® 8, pop-up menus appear whenever you press the switch key under the following scenarios:

1. Android® is running, Windows®8 is off.
2. Windows® 8 is running, Android®8 is off.
3. Both Android® and Windows® 8 are running

Using the tablet

Refer to the following steps when using the tablet as a separate device.

1. If you need to charge your tablet, connect it to a power source through the following:
 - A. Connect the micro USB cable to the power adapter.
 - B. Plug the micro USB connector into your tablet.
 - C. Plug the power adapter into a grounded power outlet.

2. Press the power button on your tablet.

Using the PC station

Refer to the following steps when using your PC station as a separate device.

1. Connect your PC station to an external display.
2. Connect your PC station to a power outlet:
 - A. Plug the AC power adapter into a 100V~240V power source.
 - B. Connect the DC power connector into your PC station's power (DC) input port.

3. Press the power button on your PC station.

Connecting to the world

Connecting to Wi-Fi networks

Wi-Fi wireless networking technology allows you to exchange data wirelessly over a network. To use Wi-Fi, enable the Wi-Fi feature in your ASUS Transformer Book Trio and connect to a wireless network. Some wireless networks are secured with a key or protected with digital certificates and requires additional steps to set up; others are open and you can easily connect to them.

NOTE:

- Turn Wi-Fi off when you are not using it to help save battery power.
 - 5GHz is supported on selected models.
-

To enable Wi-Fi and connect to a Wi-Fi network:

1. Tap  to go to the All Apps screen then tap  .
2. Slide the Wi-Fi switch to ON. When enabled, your ASUS Transformer Book Trio scans for available Wi-Fi networks.
3. Tap a network name to connect to it. If the network is secured or protected, you are prompted to key in a password or key in other credentials.

NOTE: If your ASUS Transformer Book Trio finds a network that you have connected to previously, it automatically connects to it.

Using Bluetooth

Enabling or disabling Bluetooth in your device

Bluetooth is a wireless standard used for exchanging data over short distances. Bluetooth exists in many products, such as smartphones, computers, tablet devices, and headsets.

Bluetooth is very useful when transferring data between two or more devices that are near each other.

The first time you connect to a Bluetooth device, you must pair it with your ASUS Transformer Book Trio.

NOTE: Turn Bluetooth off when you are not using it to help save battery power.

To enable or disable Bluetooth in your ASUS Transformer Book Trio, you can do any of the following:

- Tap  to go to the All Apps screen then tap . Slide the Bluetooth switch to **ON**
- Slide down the Notification area to display **ASUS Quick Settings** panel then tap .

Pairing your ASUS Transformer Book Trio with a Bluetooth device

Before you can connect to a Bluetooth device, you must first pair your ASUS Transformer Book Trio to that device. The devices stay paired, unless you remove the paired connection between them.

To pair your ASUS Transformer Book Trio to a device:

1. Tap  to go to the All Apps screen then tap . Slide the Bluetooth switch to **ON**.
2. Tap **Bluetooth** to display all available Bluetooth devices within range.

NOTES:

- If the device you want to pair with is not in the list, ensure that its Bluetooth feature is turned ON and set as Discoverable.
 - See the technical documentation that came with the device to learn how to turn its Bluetooth ON and how to set it to discoverable.
-

3. If your ASUS Transformer Book Trio has finished scanning before your Bluetooth device is ready, tap **SEARCH FOR DEVICES**.
4. In the list of available devices, tap the Bluetooth device that you want to pair with. Follow the succeeding screen instructions to complete the pairing. If necessary, refer to the technical documentation that came with the device.

Connecting your ASUS Transformer Book Trio to a Bluetooth device

After you have paired your ASUS Transformer Book Trio to a Bluetooth device, you can easily reconnect to it manually, after it is back in range.

To connect to a Bluetooth device:

1. Tap  to go to the All Apps screen then tap . Slide the Bluetooth switch to **ON**.
2. In the list of **PAIRED DEVICES**, tap the name of the paired device.

Unpairing and configuring a Bluetooth device

To unpair or configure a Bluetooth device:

1. Tap  to go to the All Apps screen then tap . Slide the Bluetooth switch to **ON**.
2. Tap **Bluetooth** then tap beside the connected Bluetooth device that you want to unpair or configure.
3. From Paired Bluetooth device screen, you can do any of the following:
 - Tap **Unpair** to unpair the device.
 - Tap **Rename** to rename the Bluetooth device.
 - Tap any of the listed profiles to enable or disable a profile.
4. Tap  on the system bar to go back to previous screen.

Managing Apps

Creating app shortcuts

Get easy access to some of your favorite applications by creating app shortcuts on your Home Screen.

To create app shortcuts:

1. Tap  to go to the All Apps screen.
2. From the All Apps screen, tap and hold the app's icon then drag it to the Home Screen.

Removing an app from the Home Screen

Free up space for new app shortcuts by removing existing app shortcuts on your Home Screen.

To remove app shortcuts:

1. Tap and hold an app until the **X Remove** appears on top of the screen.
2. Drag the app to **X Remove** to remove it from the Home Screen.

Viewing app info

You can view the detailed app information while creating a shortcut for the app. While holding an app on the All Apps screen, the display switches to Home Screen and the **App info** will appear on the top of the Home Screen display. Drag the app to **App info** to display its detailed information.

Creating app folder

You can create folders to organize shortcuts on your Home Screen.

To create an app folder:

1. On the Home Screen, tap and drag an app or shortcut onto another app until a black circle appears.

NOTES:

- The created folder is shown in a black square.
 - You can add multiple apps in your folder.
-

2. Tap the folder and tap **Unnamed Folder** to rename the folder.

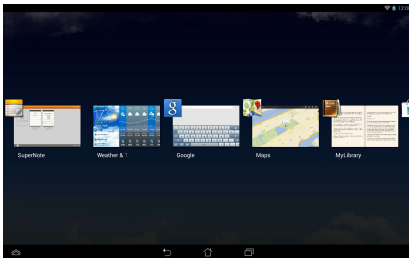

Viewing apps under the Recents screen

The Recents screen allows you to view a list of app shortcuts based from your recently launched apps. Using the Recents screen, you can easily go back to or switch between the apps you recently launched.

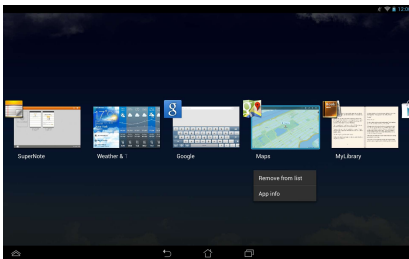

To access the Recents screen:

1. Tap  on the system bar.
2. A list shows up to display all of your recently launched apps. Tap on the app you want to launch.

To view a recent app's menu:

1. Tap and hold a recent app to display its menu.
2. To remove the app from the list, select **Remove from list**. To view its information, select **App info**.

NOTE: You can also remove a recent app from the list by swiping it up or down.

Task Manager

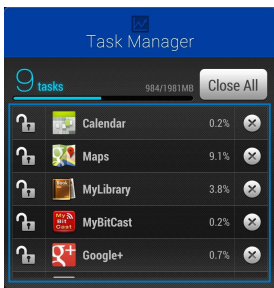

ASUS Task Manager displays a list of currently running utilities and applications, including their usages in percentages, on your ASUS Transformer Book Trio. You can also open and close the running apps individually or close all apps and utilities at once using the **One-click Clean** function.

To manage Task Manager:

1. Tap  to go to the All Apps screen then tap **WIDGETS** to display the Widgets menu.
2. Tap and hold **ASUS Task Manager** to display the ASUS Task Manager box on the Home Screen.

3. Swipe the list up and down to view all launched apps.

4. Tap  beside the running app to close it. Tap **One-click Clean** to close all running apps at once.

File Manager

File Manager allows you to easily locate and manage your data either on the internal storage or the connected external storage devices.

Accessing the internal storage

To access the internal storage:

1. Tap  to go to the All Apps screen.
2. Tap  > **Internal Storage** on the left panel to view the contents of your ASUS Transformer Book Trio then tap an item to select. If a microSD card is inserted, tap **MicroSD** to view the contents of your microSD card.
3. Tap  to return to the root directory of My Storage.

Accessing the external storage device

To access the external storage device:

1. Swipe down the notification bar on top of the screen to display the notification box.
2. Tap  **Open** to display the contents of your microSD card.
To unmount the microSD card from your ASUS Transformer Book Trio, tap  **Unmount**.

IMPORTANT! Ensure to save your data stored in your microSD card before unmounting the microSD card from your ASUS Transformer Book Trio.

Customizing your contents

From File Manager, you can copy, cut, share and delete the contents of your device and the installed external storage device.

When you customize a file or folder, tick the box beside the file or folder and the action bar appears on the upper right corner of the screen.

Settings

Settings screen allows you to configure the system settings of your ASUS Transformer Book Trio. With this system app, you can configure your ASUS Transformer Book Trio's wireless connectivity, hardware, personal, account and system settings.

There are two ways to launch the Settings screen.

1. From the All Apps screen, tap  to display the menu.
2. Swipe down the notification bar on top of the screen to display **ASUS Quick Settings** panel then tap .

Turning Android® off

You can shut down your Android® operating system by doing any of the following:

NOTE: The following steps also shuts down your tablet. However, the PC station should be turned off separately when the tablet is docked and used as part of your ASUS Notebook Trio.

- Press the power button for about two (2) seconds and when prompted, tap **Power Off** then tap **OK**.
- If your tablet is unresponsive, press and hold the power button for about seven (7) seconds until your ASUS Transformer Book Trio turns off. This will also reset your Android® OS.

IMPORTANT! Forcing the system to shut down may result to data loss. Ensure that you back up your data regularly.

When you turn on your tablet after resetting, the Setup Wizard would automatically show up and guide you through the process of setting up Android®.

Putting your tablet to sleep

To put your tablet to sleep, press the power button once.

Chapter 5: ***Power-on Self Test (POST)***

The Power-On SelfTest (POST)

The Power-On Self-Test (POST) is a series of software-controlled diagnostic tests that run when you turn on or restart your ASUS Transformer Book Trio. The software that controls the POST is installed as a permanent part of the ASUS Transformer Book Trio's architecture.

Using POST to access BIOS and Troubleshoot

During POST, you can access the BIOS settings or run troubleshooting options using the function keys of your ASUS Transformer Book Trio. You may refer to the following information for more details.

BIOS

The Basic Input and Output System (BIOS) stores system hardware settings that are needed for system startup in the ASUS Transformer Book Trio.

The default BIOS settings apply to most conditions of your ASUS Transformer Book Trio. Do not change the default BIOS settings except in the following circumstances:

- An error message appears onscreen during system bootup and requests you to run the BIOS Setup.
- You have installed a new system component that requires further BIOS settings or updates.

WARNING: Using inappropriate BIOS settings may result to system instability or boot failure. We strongly recommend that you change the BIOS settings only with the help of a trained service personnel.

Accessing BIOS

Restart your ASUS Transformer Book Trio then press  during POST.

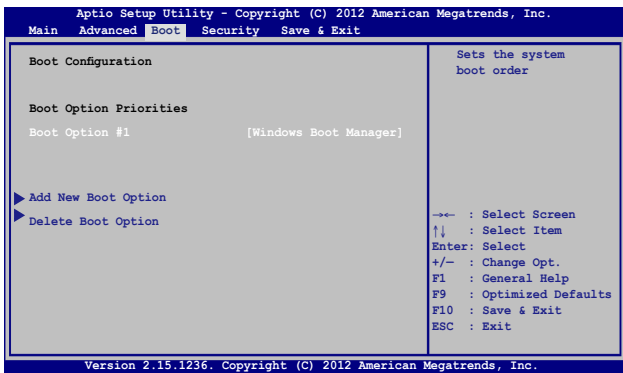

BIOS Settings

NOTE: The BIOS screens in this section are for reference only. The actual screens may differ by model and territory.

3. Leave the **Create New Password** field blank then press .
4. Select **Yes** in the confirmation box then press .

I/O Interface Security

In the Security menu, you can access I/O Interface Security to lock or unlock some interface functions of your ASUS Transformer Book Trio.

To lock an interface:

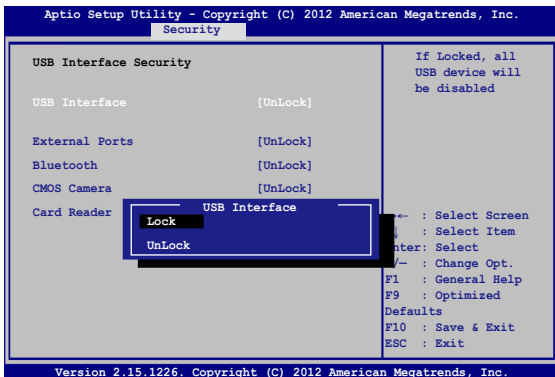

1. On the **Security** screen, select **I/O Interface Security**.
2. Select an interface you would like to lock then press

3. Select **Lock**.

USB Interface Security

Through the I/O Interface Security menu, you can also access USB Interface Security to lock or unlock ports and devices.

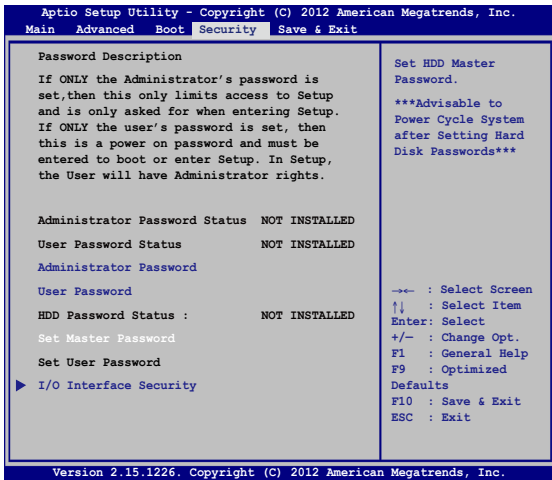

To lock the USB interface:

1. On the **Security** screen, select **I/O Interface Security > USB Interface Security**.
2. Select an interface that you would like to lock then select **Lock**.

NOTE: Setting the **USB Interface** to **Lock** also locks and hides the **External Ports** and other devices included under **USB Interface Security**.

Set Master Password

In the Security menu, you can use **Set Master Password** to set up a password-enabled access to your hard disk drive.

To set the HDD password:

1. On the **Security** screen, select **Set Master Password**.

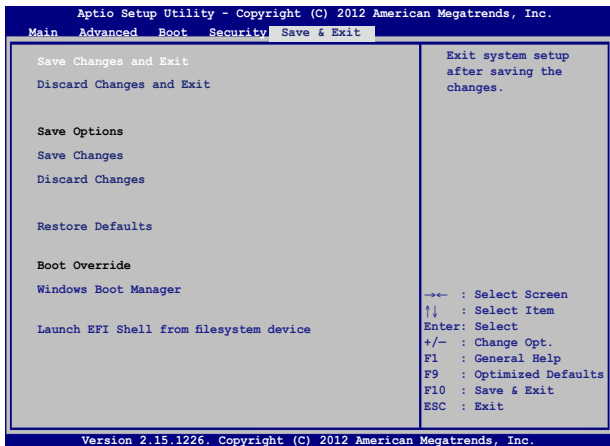

2. Type in a password then press .

3. Re-type to confirm the password then press .

4. Select **Set User Password** then repeat the previous steps to set up the user password.

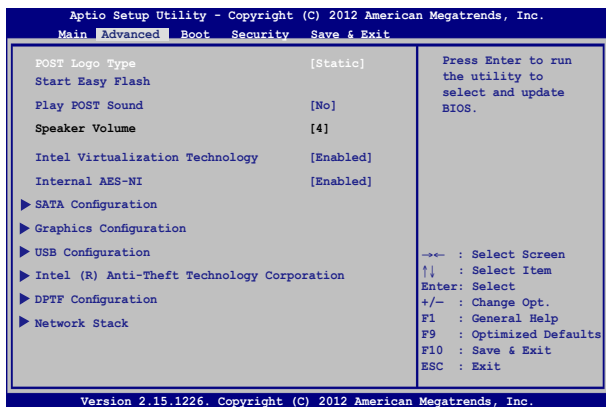

Save & Exit

To keep your configuration settings, select **Save Changes and Exit** before exiting the BIOS.

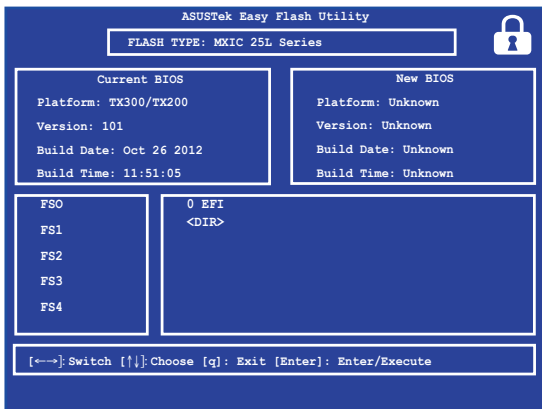

To update the BIOS:

1. Verify the ASUS Transformer Book Trio's exact model then download the latest BIOS file for your model from the ASUS website.
2. Save a copy of the downloaded BIOS file to a flash disk drive.
3. Connect your flash disk drive to your ASUS Transformer Book Trio.
4. Restart your ASUS Transformer Book Trio then press  during POST.

6. Locate your downloaded BIOS file in the flash disk drive then press .

7. After the BIOS update process, select **Exit > Restore Defaults** to restore the system to its default settings.

Troubleshoot

By pressing  during POST, you can access Windows® 8 troubleshoot options which includes the following:

- **Refresh your PC**
- **Reset your PC**
- **Advanced options**

Refresh your PC

Use **Refresh your PC** if you want to refresh your system without losing your current files and applications.

To access this during POST:

1. Restart your ASUS Transformer Book Trio then press  during POST.

2. Wait for Windows® to load the Choose an option screen then tap **Troubleshoot**.
3. Tap **Refresh your PC**.
4. In the Refresh your PC screen, read the bullet points to learn more about using this option then tap **Next**.

4. In the Reset your PC screen, read the bullet points to learn more about using this option then tap **Next**.
5. Tap your preferred reset option: **Just remove my files** or **Fully clean the drive**.
6. Tap **Reset**.

IMPORTANT! Ensure that your ASUS Transformer Book Trio is plugged in to a power source before resetting your system.

Advanced options

Use **Advanced options** to perform additional troubleshooting options in your ASUS Transformer Book Trio.

To access this during POST:

1. Restart your ASUS Transformer Book Trio then press  during POST.

2. Wait for Windows® to load the Choose an option screen then tap **Troubleshoot**.
3. Tap **Advanced options**.
4. In the Advanced options screen, select the troubleshooting option you wish to perform.
5. Follow the succeeding steps to complete the process.

Using System Image Recovery

Under **Advanced options**, you can use **System Image Recovery** to recover your system using your ASUS Transformer Book Trio's original image file.

To access this during POST:

1. Restart your ASUS Transformer Book Trio then press  during POST.

2. Wait for Windows® to load the Choose an option screen then tap **Troubleshoot**.
3. Tap **Advanced options**.

4. In the Advanced options screen, select **System Image Recovery**.

To help you maximize the use of your ASUS Transformer Book Trio, maintain its system performance, and ensure all your data are kept secured, here are some useful tips that you can follow:

- Update Windows® periodically to ensure that your applications have the latest security settings.
- Use ASUS Live Update to update ASUS-exclusive applications, drivers and utilities in your ASUS Transformer Book Trio. Refer to the ASUS Tutor installed in your ASUS Transformer Book Trio for more details.
- Use an anti-virus software to protect your data and keep this updated too.
- Unless absolutely necessary, refrain from using force shutdown to turn off your ASUS Transformer Book Trio.
- Always backup your data and make it a point to create a backup data in an external storage drive.
- Refrain from using the ASUS Transformer Book Trio at extremely high temperatures. If you are not going to use your ASUS Transformer Book Trio for a long period of time (at least a month), we recommend that you take out the battery if the battery is removable.
- Disconnect all external devices and ensure you have the following items prior to resetting your ASUS Transformer Book Trio:
 - Product key for your operating systems and other installed applications
 - Backup data
 - Log in ID and password
 - Internet connection information

Hardware FAQs

1. A black dot, or sometimes a colored dot, appears onscreen when I turn on the ASUS Transformer Book Trio. What should I do?

Although these dots normally appear onscreen, they will not affect your system. If the incident continues and subsequently affects system performance, consult an authorized ASUS service center.

2. My display panel has an uneven color and brightness. How can I fix this?

The color and brightness of your display panel may be affected by the angle and current position of your ASUS Transformer Book Trio. The brightness and color tone of your ASUS Transformer Book Trio may also vary per model. You may use the function keys or the display settings in your operating system to adjust the appearance of your display panel.

3. How can I maximize my ASUS Transformer Book Trio's battery life?

You can try doing any of the following suggestions:

- Use **Battery Mode** under Power4Gear.
- Use the function keys to adjust the display brightness.
- Enable **Battery Saving** mode under Instant On.
- If you are not using any Wi-Fi connection, switch your system into **Airplane mode**.
- Disconnect unused USB devices.
- Close unused applications, especially those that take up too much system memory.

4. **My battery LED indicator does not light up. What's wrong?**

- Check whether the power adapter or battery pack is attached correctly. You may also disconnect the power adapter or battery pack, wait for a minute, then reconnect them again to the power outlet and ASUS Transformer Book Trio.
- If the problem still exists, contact your local ASUS service center for assistance.

5. **Why is my touchpad not working?**

- Press  +  to enable your touchpad.
- Check if ASUS Smart Gesture has been set to disable the touchpad when connecting an external pointing device.

6. **When I play audio and video files, why can't I hear any sound from my ASUS Transformer Book Trio's audio speakers?**

You can try doing any of the following suggestions:

- Press  +  to turn up the speaker volume.
- Check if your speakers were set to mute.
- Check if a headphone jack is connected to your ASUS Transformer Book Trio and remove it.
- Unlock the I/O Interface Security in your system's BIOS. For more details, refer to the *I/O Interface Security* section in this manual.

7. **What should I do if my ASUS Transformer Book Trio's power adapter gets lost or my battery stops working?**

Contact your local ASUS service center for assistance.

8. Why does audio still come out from my ASUS Transformer Book Trio's audio speakers even if I already connected my headphone into the right jack port?

Go to **Control Panel > Hardware and Sound** then access **Audio Manager** to configure the settings.

9. My ASUS Transformer Book Trio cannot do keystrokes correctly because my cursor keeps on moving. What should I do?

Make sure that nothing accidentally touches or presses on your touchpad while you type on the keyboard. You can also disable

your touchpad by pressing  + .

10. My ASUS Transformer Book Trio's touchpad is not working. What should I do?

You can try doing any of the following suggestions:

- Check if ASUS Smart Gesture is set to disable touchpad by connecting an external pointing device to your ASUS Transformer Book Trio. If yes, disable this function.

- Press  + .

11. Instead of showing letters, pressing the "U", "I", and "O" keys on my keyboard displays numbers. How can I change this?

Press the  key or  +  (on selected models) on your ASUS Transformer Book Trio to turn off this feature and use the said keys for inputting letters.

Software FAQs

- 1. When I turn on my ASUS Transformer Book Trio, the power indicator lights up but not my drive activity indicator. System bootup does not happen as well. What can I do to fix this?**

You can try doing any of the following suggestions:

- Force shutdown your ASUS Transformer Book Trio by pressing the power button for more than four (4) seconds. Check if the power adapter and battery pack are inserted correctly then turn on your ASUS Transformer Book Trio.
- If the problem still exists, contact your local ASUS service center for assistance.

- 2. What should I do when my screen displays this message: "Remove disks or other media. Press any key to restart."?**

You can try doing any of the following suggestions:

- Remove all connected USB devices then restart your ASUS Transformer Book Trio.
- Remove any optical discs that are left inside the optical drive then restart.
- If the problem still exists, your ASUS Transformer Book Trio might have a memory storage problem. Contact your local ASUS service center for assistance.

- 3. My ASUS Transformer Book Trio boots slower than usual and my operating system lags. How can I fix this?**

Delete the applications you recently installed or were not included with your operating system package then restart your system.

4. **My ASUS Transformer Book Trio does not boot up. How can I fix this?**

You can try doing any of the following suggestions:

- Remove all connected devices to your ASUS Transformer Book Trio then restart your system.
- Press **F9** upon startup. When your ASUS Transformer Book Trio enters **Troubleshooting**, select **Refresh** or **Reset your PC**.
- If the problem still exists, contact your local ASUS service center for assistance.

5. **Why can't my ASUS Transformer Book Trio wake up from sleep or hibernate mode?**

- You need to press the power button to resume your last working state.
- Your system might have completely used up its battery power. Connect the power adapter to your ASUS Transformer Book Trio and connect to a power outlet then press the power button.

6. How can I boot to DOS using my USB drive or ODD?

Refer to the following steps:

- a. Restart your ASUS Transformer Book Trio and enter BIOS by pressing **F2** on your keyboard.
- b. Go to **Boot > Launch CSM > Enabled**.
- c. Go to the **Security** menu then set **Secure Boot Control** to **Disabled**.
- d. Press **F10** to save changes and exit BIOS.
- e. Press and hold **ESC** to launch boot menu when your ASUS Transformer Book Trio restarts.

DVD-ROM Drive Information (on selected models)

The DVD-ROM drive allows you to view and create your own CDs and DVDs. You can purchase an optional DVD viewer software to view DVD titles.

Regional Playback Information

Playback of DVD movie titles involves decoding MPEG2 video, digital AC3 audio and decryption of CSS protected content. CSS (sometimes called copy guard) is the name given to the content protection scheme adopted by the motion picture industry to satisfy a need to protect against unlawful content duplication.

Although the design rules imposed on CSS licensors are many, one rule that is most relevant is playback restrictions on regionalized content. In order to facilitate geographically staggered movie releases, DVD video titles are released for specific geographic regions as defined in "Region Definitions" below. Copyright laws require that all DVD movies be limited to a particular region (usually coded to the region at which it is sold). While DVD movie content may be released for multiple regions, CSS design rules require that any system capable of playing CSS encrypted content must only be capable of playing one region.

IMPORTANT! The region setting may be changed up to five times using the viewer software, then it can only play DVD movies for the last region setting. Changing the region code after that will require factory resetting which is not covered by warranty. If resetting is desired, shipping and resetting costs will be at the expense of the user.

Internal Modem Compliancey

The ASUS Transformer Book Trio with internal modem model complies with JATE (Japan), FCC (US, Canada, Korea, Taiwan), and CTR21. The internal modem has been approved in accordance with Council Decision 98/482/EC for pan-European single terminal connection to the public switched telephone network (PSTN). However due to differences between the individual PSTNs provided in different countries, the approval does not, of itself, give an unconditional assurance of successful operation on every PSTN network termination point. In the event of problems you should contact your equipment supplier in the first instance.

Overview

On 4th August 1998 the European Council Decision regarding the CTR 21 has been published in the Official Journal of the EC. The CTR 21 applies to all non voice terminal equipment with DTMF-dialling which is intended to be connected to the analogue PSTN (Public Switched Telephone Network).

CTR 21 (Common Technical Regulation) for the attachment requirements for connection to the analogue public switched telephone networks of terminal equipment (excluding terminal equipment supporting the voice telephony justified case service) in which network addressing, if provided, is by means of dual tone multifrequency signalling.

Network Compatibility Declaration

Statement to be made by the manufacturer to the Notified Body and the vendor: "This declaration will indicate the networks with which the equipment is designed to work and any notified networks with which the equipment may have inter-working difficulties."

Statement to be made by the manufacturer to the user: "This declaration will indicate the networks with which the equipment is designed to work and any notified networks with which the equipment may have inter-working difficulties. The manufacturer shall also associate a statement to make it clear where network compatibility is dependent on physical and software switch settings. It will also advise the user to contact the vendor if it is desired to use the equipment on another network."

Up to now the Notified Body of CETECOM issued several pan-European approvals using CTR 21. The results are Europe's first modems which do not require regulatory approvals in each individual European country.

Non-Voice Equipment

Answering machines and loud-speaking telephones can be eligible as well as modems, fax machines, auto-dialers and alarm systems. Equipment in which the end-to-end quality of speech is controlled by regulations (e.g. handset telephones and in some countries also cordless telephones) is excluded.

This table shows the countries currently under the CTR21 standard.

1 National requirements will apply only if the equipment may use pulse dialling (manufacturers may state in the user guide that the equipment is only intended to support DTMF signalling, which would make any additional testing superfluous).

In The Netherlands additional testing is required for series connection and caller ID facilities.

Federal Communications Commission Interference Statement

This device complies with FCC Rules Part 15. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING! The use of a shielded-type power cord is required in order to meet FCC emission limits and to prevent interference to the nearby radio and television reception. It is essential that only the supplied power cord be used. Use only shielded cables to connect I/O devices to this equipment. You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC Radio Frequency (RF) Exposure Caution Statement

WARNING! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. "The manufacture declares that this device is limited to Channels 1 through 11 in the 2.4GHz frequency by specified firmware controlled in the USA."

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting. End users must follow the specific operating instructions for satisfying RF exposure compliance.

Declaration of Conformity (R&TTE directive 1999/5/EC)

The following items were completed and are considered relevant and sufficient:

- Essential requirements as in [Article 3]
- Protection requirements for health and safety as in [Article 3.1a]
- Testing for electric safety according to [EN 60950]
- Protection requirements for electromagnetic compatibility in [Article 3.1b]
- Testing for electromagnetic compatibility in [EN 301 489-1] & [EN 301 489-17]
- Effective use of the radio spectrum as in [Article 3.2]
- Radio test suites according to [EN 300 328-2]

CE Marking

CE marking for devices without wireless LAN/Bluetooth

The shipped version of this device complies with the requirements of the EEC directives 2004/108/EC "Electromagnetic compatibility" and 2006/95/EC "Low voltage directive".

CE marking for devices with wireless LAN/ Bluetooth

This equipment complies with the requirements of Directive 1999/5/EC of the European Parliament and Commission from 9 March, 1999 governing Radio and Telecommunications Equipment and mutual recognition of conformity.

IC Radiation Exposure Statement for Canada

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with IC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting. End users must follow the specific operating instructions for satisfying RF exposure compliance.

Operation is subject to the following two conditions:

- This device may not cause interference and
- This device must accept any interference, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service (i.e. co-channel Mobile Satellite systems) this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This device complies with Industry Canada licence-exempt RSS standard(s).

Déclaration d'Industrie Canada relative à l'exposition aux ondes radio

Cet appareil est conforme aux limites d'exposition aux radiations d'Industrie Canada définies pour un environnement non-contrôlé. Pour maintenir la conformité avec les exigences d'exposition RF d'IC, veuillez éviter tout contact direct avec l'antenne pendant l'émission. Les utilisateurs finaux doivent suivre les instructions de fonctionnement spécifiques pour satisfaire la conformité aux expositions RF.

Son utilisation est sujette aux deux conditions suivantes :

- Cet appareil ne peut pas causer d'interférence, et
- Cet appareil doit accepter toute interférence, y compris les interférences qui pourraient causer un fonctionnement non souhaité de l'appareil.

Pour éviter les interférences radio avec le service sous licence (c'est à-dire le partage de canal avec les systèmes de téléphonie satellite), cet appareil est destiné à être utilisé en intérieur et loin des fenêtres pour fournir un blindage maximal. Tout appareil (ou son antenne d'émission) qui est installé en extérieur est sujet à cette licence.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

CAN ICES-3 (B)/NMB-3 (B)

Radiation Exposure Statement:

The product comply with the Canada portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

Déclaration d'exposition aux radiations

Le produit est conforme aux limites d'exposition pour les appareils portables RF pour les Etats-Unis et le Canada établies pour un environnement non contrôlé.

Le produit est sûr pour un fonctionnement tel que décrit dans ce manuel. La réduction aux expositions RF peut être augmentée si l'appareil peut être conservé aussi loin que possible du corps de l'utilisateur ou que le dispositif est réglé sur la puissance de sortie la plus faible si une telle fonction est disponible.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter, except tested built-in radios. The County Code Selection feature is disabled for products marketed in the US/ Canada.

Cet appareil et son antenne ne doivent pas être situés ou fonctionner en conjonction avec une autre antenne ou un autre émetteur, exception faites des radios intégrées qui ont été testées. La fonction de sélection de l'indicatif du pays est désactivée pour les produits commercialisés aux États-Unis et au Canada.

Caution:

- (i) the device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;
- (ii) the maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall comply with the e.i.r.p. limit; and
- (iii) the maximum antenna gain permitted for devices in the band 5725-5825 MHz shall comply with the e.i.r.p. limits specified for point-to-point and non point-to-point operation as appropriate.
- (iv) Users should also be advised that high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

Avertissement:

Le guide d'utilisation des dispositifs pour réseaux locaux doit inclure des instructions précises sur les restrictions susmentionnées, notamment :

(i) les dispositifs fonctionnant dans la bande 5 150-5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

(ii) le gain maximal d'antenne permis pour les dispositifs utilisant les bandes 5 250-5 350 MHz et 5 470-5 725 MHz doit se conformer à la limite de p.i.r.e.;

(iii) le gain maximal d'antenne permis (pour les dispositifs utilisant la bande 5 725-5 825 MHz) doit se conformer à la limite de p.i.r.e. spécifiée pour l'exploitation point à point et non point à point, selon le cas.

(iv) De plus, les utilisateurs devraient aussi être avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu'ils ont la priorité) pour les bandes 5 250-5 350 MHz et 5 650-5 850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

Wireless Operation Channel for Different Domains

N. America	2.412-2.462 GHz	Ch01 through CH11
Japan	2.412-2.484 GHz	Ch01 through Ch14
Europe ETSI	2.412-2.472 GHz	Ch01 through Ch13

France Restricted Wireless Frequency Bands

Some areas of France have a restricted frequency band. The worst case maximum authorized power indoors are:

- 10mW for the entire 2.4 GHz band (2400 MHz–2483.5 MHz)
- 100mW for frequencies between 2446.5 MHz and 2483.5 MHz

NOTE: Channels 10 through 13 inclusive operate in the band 2446.6 MHz to 2483.5 MHz.

There are few possibilities for outdoor use: on private property or on the private property of public persons, use is subject to a preliminary authorization procedure by the Ministry of Defense, with maximum authorized power of 100mW in the 2446.5–2483.5 MHz band. Use outdoors on public property is not permitted.

In the departments listed below, for the entire 2.4 GHz band:

- Maximum authorized power indoors is 100mW
- Maximum authorized power outdoors is 10mW

Departments in which the use of the 2400–2483.5 MHz band is permitted with an EIRP of less than 100mW indoors and less than 10mW outdoors:

01 Ain	02 Aisne	03 Allier
05 Hautes Alpes	08 Ardennes	09 Ariège
11 Aude	12 Aveyron	16 Charente
24 Dordogne	25 Doubs	26 Drôme
32 Gers	36 Indre	37 Indre et Loire
41 Loir et Cher	45 Loiret	50 Manche
55 Meuse	58 Nièvre	59 Nord
60 Oise	61 Orne	63 Puy du Dôme
64 Pyrénées Atlantique	66 Pyrénées Orientales	67 Bas Rhin
68 Haut Rhin	70 Haute Saône	71 Saône et Loire
75 Paris	82 Tarn et Garonne	84 Vaucluse
88 Vosges	89 Yonne	90 Territoire de Belfort
94 Val de Marne		

This requirement is likely to change over time, allowing you to use your wireless LAN card in more areas within France. Please check with ART for the latest information (www.arcep.fr)

NOTE: Your WLAN Card transmits less than 100mW, but more than 10mW.

UL Safety Notices

Required for UL 1459 covering telecommunications (telephone) equipment intended to be electrically connected to a telecommunication network that has an operating voltage to ground that does not exceed 200V peak, 300V peak-to-peak, and 105V rms, and installed or used in accordance with the National Electrical Code (NFPA 70).

When using the ASUS Transformer Book Trio modem, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- DO NOT use the ASUS Transformer Book Trio near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
- DO NOT use the ASUS Transformer Book Trio during an electrical storm. There may be a remote risk of electric shock from lightning.
- DO NOT use the ASUS Transformer Book Trio in the vicinity of a gas leak.

Required for UL 1642 covering primary (nonrechargeable) and secondary (rechargeable) lithium batteries for use as power sources in products. These batteries contain metallic lithium, or a lithium alloy, or a lithium ion, and may consist of a single electrochemical cell or two or more cells connected in series, parallel, or both, that convert chemical energy into electrical energy by an irreversible or reversible chemical reaction.

- Do not dispose the ASUS Transformer Book Trio battery pack in a fire, as they may explode. Check with local codes for possible special disposal instructions to reduce the risk of injury to persons due to fire or explosion.
- Do not use power adapters or batteries from other devices to reduce the risk of injury to persons due to fire or explosion. Use only UL certified power adapters or batteries supplied by the manufacturer or authorized retailers.

Power Safety Requirement

Products with electrical current ratings up to 6A and weighing more than 3Kg must use approved power cords greater than or equal to: H05VV-F, 3G, 0.75mm² or H05VV-F, 2G, 0.75mm².

TV Notices

Note to CATV System Installer—Cable distribution system should be grounded (earthed) in accordance with ANSI/NFPA 70, the National Electrical Code (NEC), in particular Section 820.93, Grounding of Outer Conductive Shield of a Coaxial Cable – installation should include bonding the screen of the coaxial cable to the earth at the building entrance.

REACH

Complying with the REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals) regulatory framework, we publish the chemical substances in our products at ASUS REACH website at <http://csr.asus.com/english/REACH.htm>.

„Dieses Gerät wurde gemäß der Entscheidung 98/482/EG des Rates europaweit zur Anschaltung als einzelne Endeinrichtung an das öffentliche Fernsprechnetz zugelassen. Aufgrund der zwischen den öffentlichen Fernsprechnetzen verschiedener Staaten bestehenden Unterschiede stellt diese Zulassung an sich jedoch keine unbedingte Gewähr für einen erfolgreichen Betrieb des Geräts an jedem Netzabschlußpunkt dar.

Falls beim Betrieb Probleme auftreten, sollten Sie sich zunächst an ihren Fachhändler wenden.“

«Ο εξοπλισμός έχει εγκριθεί για πανευρωπαϊκή σύνδεση μεμονωμένου τερματικού με το δημόσιο τηλεφωνικό δίκτυο μεταγωγής (PSTN), σύμφωνα με την απόφαση 98/482/ΕΚ του Συμβουλίου· ωστόσο, επειδή υπάρχουν διαφορές μεταξύ των επιμέρους PSTN που παρέχονται σε διάφορες χώρες, η έγκριση δεν παρέχει απ' αυτής ανεπιφύλακτη εξασφάλιση επιτυχούς λειτουργίας σε κάθε σημείο απόληξης του δικτύου PSTN.

Εάν ανακύψουν προβλήματα, θα πρέπει κατ' αρχάς να απευθύνεστε στον προμηθευτή του εξοπλισμού σας.»

«La presente apparecchiatura terminale è stata approvata in conformità della decisione 98/482/CE del Consiglio per la connessione paneuropea come terminale singolo ad una rete analogica PSTN. A causa delle differenze tra le reti dei differenti paesi, l'approvazione non garantisce però di per sé il funzionamento corretto in tutti i punti di terminazione di rete PSTN.

In caso di problemi contattare in primo luogo il fornitore del prodotto.»

«Este equipamento foi aprovado para ligação pan-europeia de um único terminal à rede telefónica pública comutada (RTPC) nos termos da Decisão 98/482/CE. No entanto, devido às diferenças existentes entre as RTPC dos diversos países, a aprovação não garante incondicionalmente, por si só, um funcionamento correcto em todos os pontos terminais da rede da RTPC.

Em caso de problemas, deve entrar-se em contacto, em primeiro lugar, com o fornecedor do equipamento.»

«Este equipo ha sido homologado de conformidad con la Decisión 98/482/CE del Consejo para la conexión paneuropea de un terminal simple a la red telefónica pública conmutada (RTPC). No obstante, a la vista de las diferencias que existen entre las RTPC que se ofrecen en diferentes países, la homologación no constituye por sí sola una garantía incondicional de funcionamiento satisfactorio en todos los puntos de terminación de la red de una RTPC.

En caso de surgir algún problema, procede ponerse en contacto en primer lugar con el proveedor del equipo.»

”Utrustningen har godkänts i enlighet med rådets beslut 98/482/EG för alleuropeisk anslutning som enskild terminal till det allmänt tillgängliga kopplade telenätet (PSTN). På grund av de skillnader som finns mellan telenätet i olika länder utgör godkännandet emellertid inte i sig självt en absolut garanti för att utrustningen kommer att fungera tillfredsställande vid varje telenätsanslutningspunkt.

Om problem uppstår bör ni i första hand kontakta leverantören av utrustningen.”
