Sagemcom

Dear Customer,

You have just acquired a Sagemcom DECT telephone. Thank you for placing your confidence in us.

This device has been manufactured with the utmost care. If you should have difficulties in operating it, we recommend that you consult this manual.

For your comfort and safety, we urge you to carefully read the paragraph « **Recommendations and safety instructions** » of the warranty card included in the pack.

CE The CE label confirms that the product complies with the 1999/5/EC regulations of the European Union Parliament regarding wireless systems and telecommunications.

The declaration of compliance may be looked up on the **http://support.sagemcom.com** site or can be obtained from the following address :

X-GEM SAS
9 rue de la Négresse
64200 Biarritz - France

bis	5 Pick-up / Access to outgoing call list (long press in standby mode)
1	6 **Key 1 :** - Access to voice mail (long press in standby mode) - Access to answering machine messages (if answering machine mode is activated)
*	7 **✱ key :** Lock / unlock keypad (long press from home screen)
	8 Activate / deactivate hands-free mode
	9 Browsing through the menus
C	10 Cancel the action / Return to previous menu
	11 Hang up (during a call) / Return to main menu / Turn off/on the handset (long press)
#	12 **# key :** - Activate / deactivate the mute mode (long press during a call) - Activate / deactivate the silent mode (long press from home screen)
	13 Access phonebook
	14 Microphone

The screen

In standby mode or during use, the screen indicates the current state through icons, and in particular :

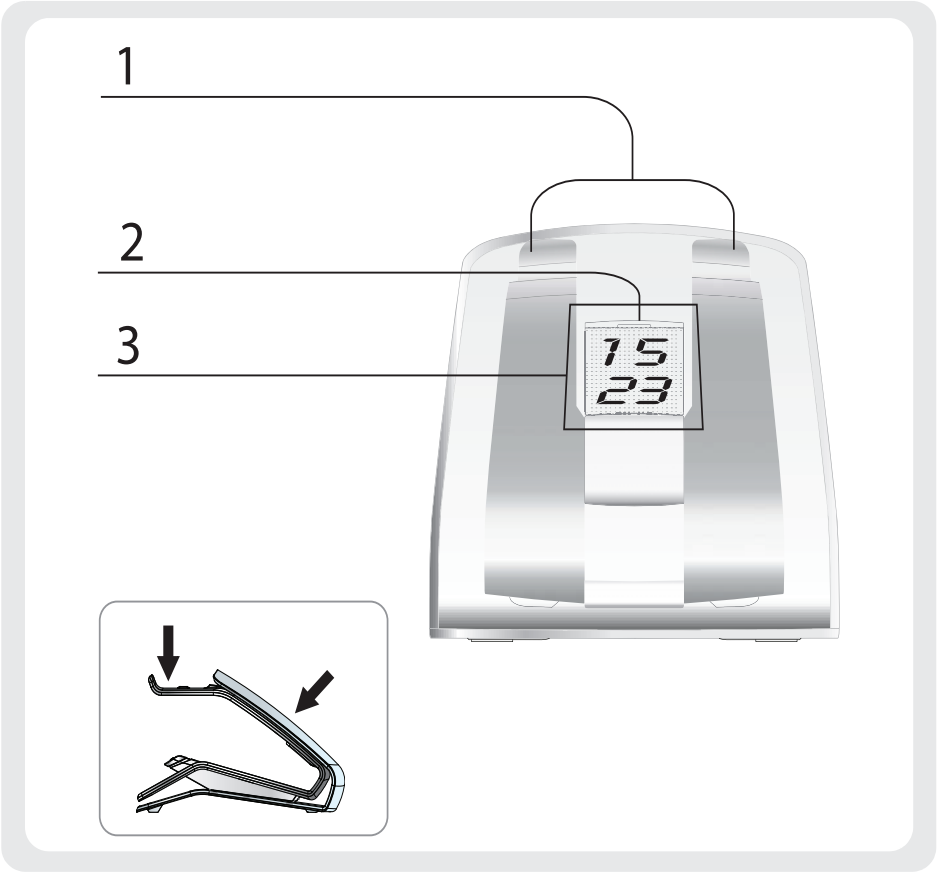
* : during a call

Legend	Description
1	**Status icons :** indicates your phone's current state.
2	**Information field :** the handset's name and number, the current time and date.
3	**Action icons :** functions associated to OK and C keys.

THE ICONS DISPLAYED

	Battery charge condition		Silent mode activated
	DECT signal : blinks when the handset is out of range of the base or when the base is not supplied.		Keypad locked
	Phone in conversation mode		Voice(s) message(s) not consulted
	Microphone mute activated		Answering machine activated
	Hands-free activated		New message(s) on your answering machine
	Missed call(s)		

The charger



1	Charging contacts
2	**Indicator light** : Backlighting is red, green, or orange.
3	**Display screen :** • the current time, • number of messages on answering machine or voice mail.

DISPLAY AND INDICATION BACKLIGHTING

> Note To change the display colour of your indicator light, refer to paragraph "**Modifying the display colour", page 59**.
> To change the time display on your screen, refer to paragraph "**Activating time display", page 59**.

Case 1 :

- the display colour selected is "**Variable on events**",
- time display is activated,
- the handset is placed on its charger.

Colour and display	Indication
Red : is permanently displayed and goes out if the handset is taken off the charger.	Reception of an unknown call.
Orange : is permanently displayed and goes out if the handset is taken off the charger.	Reception of a CLIP call.
Green : is permanently displayed and goes out if the handset is taken off the charger.	Receiving a CLIP call whose number has been entered into the directory.
• Green : blinks permanently and goes out if the handset is taken off the charger. • Display of the current time on the screen.	There are missed call(s).
• Green : blinks permanently and goes out if the handset is taken off the charger. • Display of messages on answering machine or voice mail.	There are message(s) on the answering machine or voice mail.
• Red : blinks permanently and goes out if the handset is taken off the charger. • Display of messages on answering machine.	Answering machine memory full.
Green : is displayed for 1s then goes out.	The handset is placed on the charger.

Case 2 :

- the display colour selected is "Red" or "Green" or Orange",
- time display is activated.

If the handset is on or off its charger, the backlighting is set to the selected colour and the current time is displayed.

Note	Once the permanent colour has been selected, no other effect is displayed and the charger behaves as a lamp.

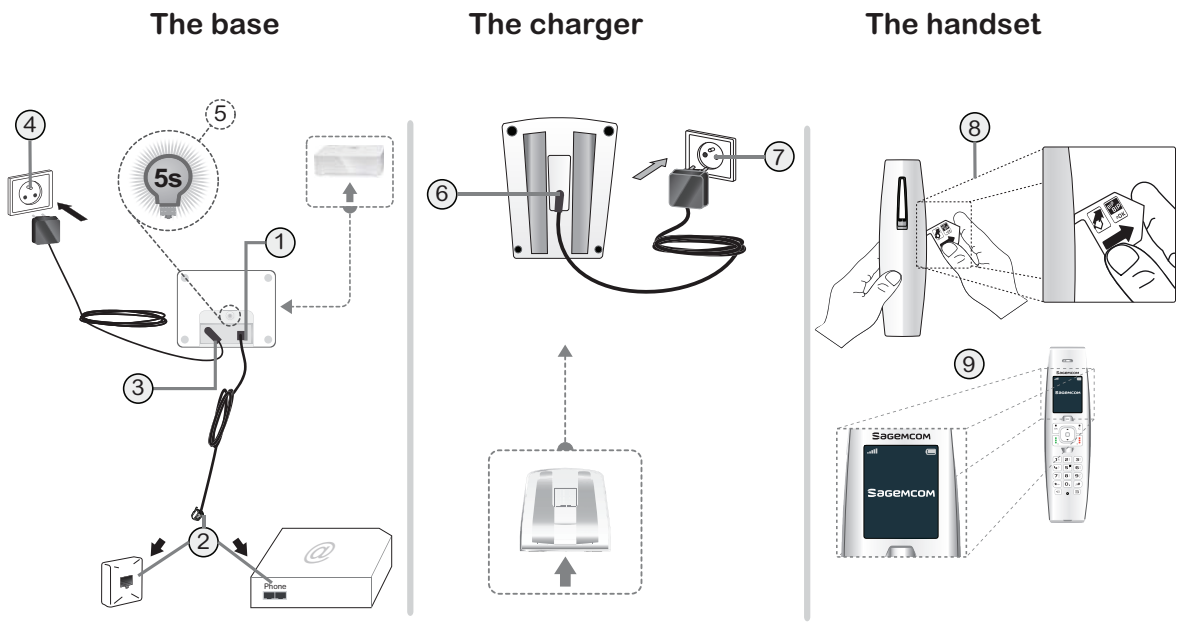
Case 3 :

- the display colour selected is "Off",
- time display is activated.

If the handset is on or off its charger, the backlighting is deactivated and the current time is displayed.

Note	If time display is deactivated, neither the time nor the indication for answering machine nor for voice mail are displayed.

Installing the phone



1 Plug the phone cable into the socket of your base.

2 Connect the other end of the cable with the phone wall socket or with the Gateway.

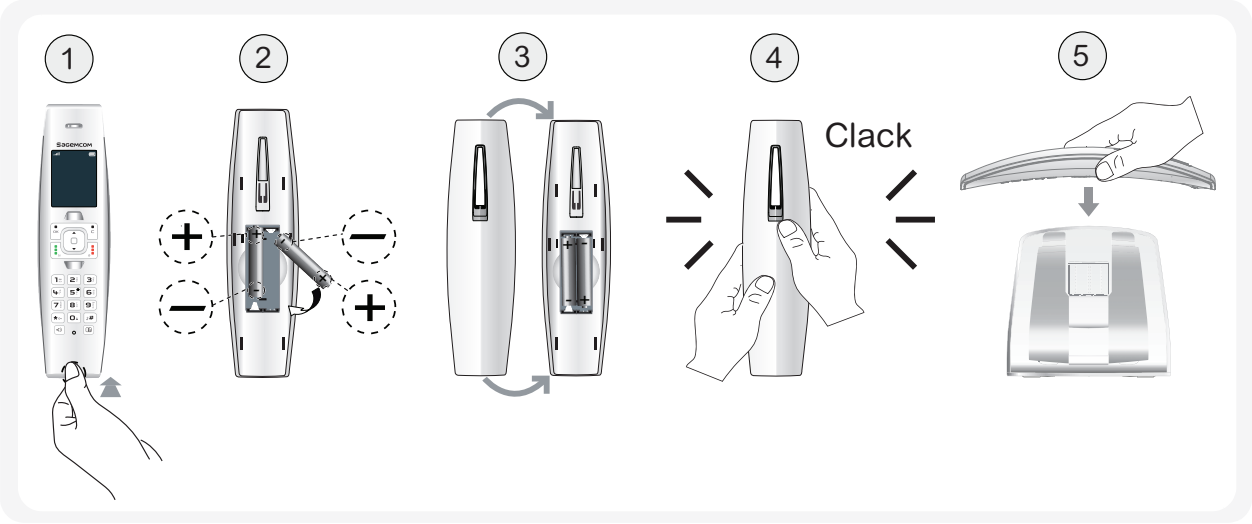
3 Connect the power adapter cord to the socket on the bottom of the base.

4 Connect the other end of the cable with the power wall socket.
5 The indicator on the base lights during 5 seconds.
6 Connect the power supply unit to the charger.
7 Plug in the other end of the power supply unit to the mains.
8 Remove the tab.
9 The handset screen comes on. The message "SAGEMCOM" appears on the screen.

Note	To ensure optimum charging, leave the handset on the base for at least 10 hours before using the phone for the first time.

Note	If your handset battery is empty leave the handset in the charging unit for at least 4 minutes.

Replacing the batteries



1 Remove the battery compartment cover.
2 Insert the new batteries one by one in compliance with the polarity of the batteries.
3 Replace the battery compartment cover.
4 Press the cover gently. The "Click" sound indicates that the cover is in the locked position.
5 Place the handset on its charger.

Browsing principle

To browse through menus, use the browser keys and the keys OK and C :

Key	Corresponds to... (throughout the manual)
	▲ : select the previous menu (or setting).
	▼ : select the next menu (or setting).

1 Press **MENU** OK.
The main menu is displayed on the screen.

2 Press the top (▲) or the bottom (▼) of the navigation key to select the desired function.

3 Select your choice / Enter the menu by pressing the **Select** OK key.

4 Cancel your choice / Exit the displayed menu :

- either by pressing thee **Back** C key : return to previous menu.
- or by pressing the key : the home screen is displayed.

DETAILED BROWSER EXAMPLE: CHANGING THE RING TONE OF EXTERNAL CALLS

MENU > Audio

1 Press **MENU** OK.

2 Press the top (▲) or the bottom (▼) of the navigation key until the menu Audio is displayed.

3 Enter the Audio menu by pressing **Select** OK.

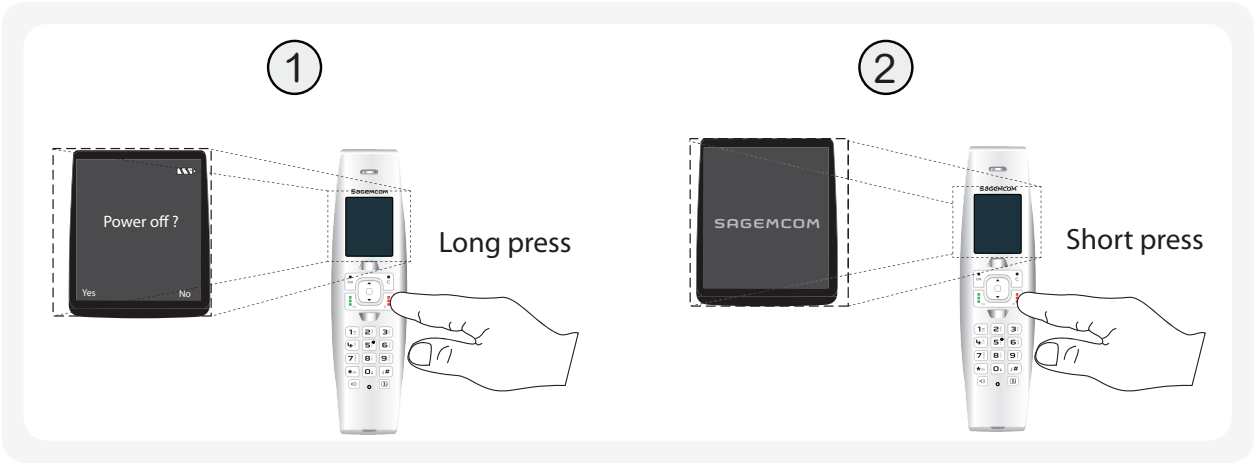
4 Select External ringtone using the ▲ or ▼ keys.

5 Press **Select** OK.

6 Scroll down the pre-recorded sounds and press **Select** OK.

7 Adjust the volume of the ring tone using the ▲ or ▼ keys and press **Select** OK.
The action is confirmed by the "**OK**" indication.

Switch the handset off and then on again



1 To turn off the handset, hold down the red key.

The "**Power off ?**" message is displayed on the screen. Press **Yes** to confirm.

2 To turn on your handset, press the red key. The "SAGEMCOM" message is displayed on the screen.

Settings to make before use

- When starting up the first time, the Language menu is displayed.
- Select the language to be used using the ▲ or ▼ keys and validate using the key.
- The Country menu is displayed.
- Select the country using the ▲ or ▼ keys and validate using the key.
- The date and time setting menu is displayed.
- Enter the right date and time and validate using the key.
  The message "**OK**" is displayed on the screen.

Important After setting date and time, place the handset on the charger to synchronise the display.

Call...

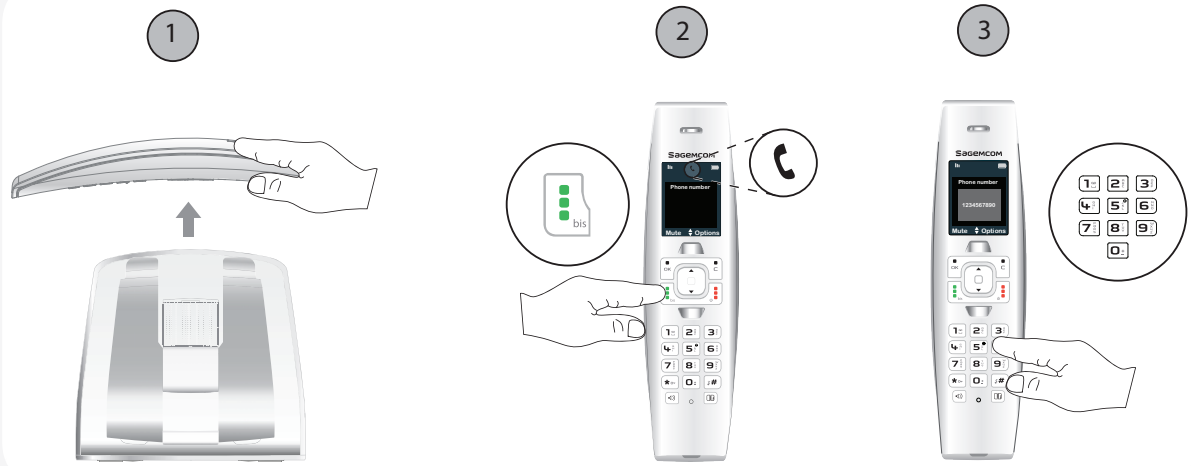
Managing your calls

Making a call

METHOD 1 (PRE-DIALING)

1 Pick up the handset.
2 Dial your contact's number.
3 Press the green bis key.

METHOD 2 (POST-DIALING)

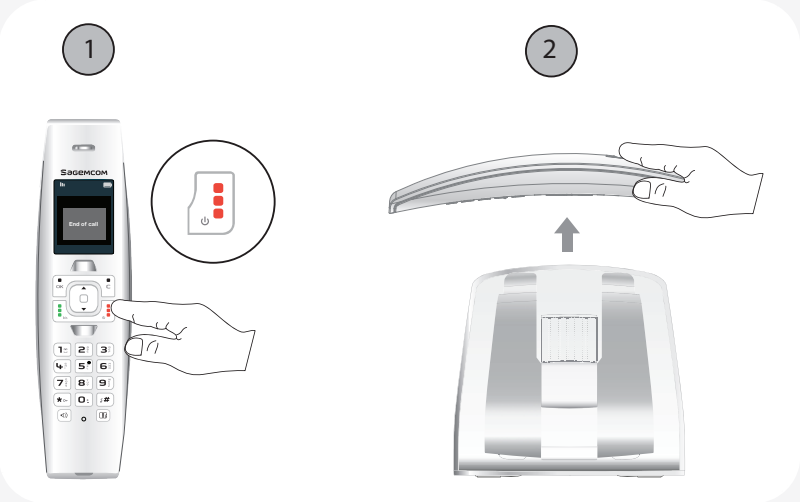


1 Pick up the handset.

2 Press the green key.

3 Dial your contact's number.

Ending a call

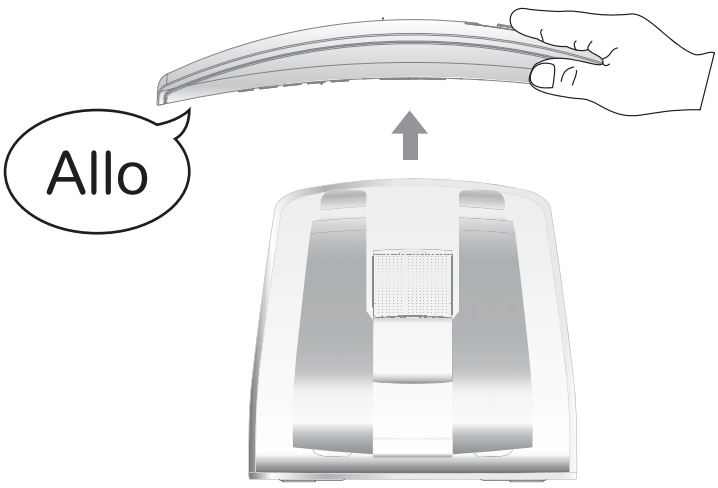


1 At the end of the call, press the red key.

2 Put the handset back on its charger.

Receiving a call

IF THE «AUTO PICKUP» IS ACTIVATED



Pick up the handset.

IF THE «AUTO PICKUP» IS DEACTIVATED

1 Pick up the handset.

2 Press the green bis key.

Choose your line

This menu allows you to select the line on which you want to make a second outgoing call (subject to availability of service).

1 During a call, press **Options**.

2 Select **Select call line** and press **Select**.

3 Select your line using the keys ▲ or ▼.

4 Press **Select**. The action is confirmed by the "**OK**" indication.

Managing several calls

Your phone allows you to manage several calls (subject to availability of service) when you are already in a call.

Receiving a second call

During a call, a beep indicates the arrival of a second call.
The contact details of the second caller are displayed on the screen.

Case 1 : Answer the new call and put the current call on hold.

- Press the green key.
  The first caller is put on hold and you can speak with the new caller.

Case 2 : Answer the new call and end the current call.

- Press **Replace**.
  The call with your first caller is ended. You can speak with the new caller.

> **Note** To reject a second call, press **Release all**.

Switching from one call to the other

During a conversation press **Switch**. The current call is put on hold in order to take the call that was previously on hold.

Ending one of the calls in progress

Options > End active call

During a conversation :

- Press **Options**.
- Choose the option **End active call** using the ▲ or ▼ keys.
- Press **Select**.
  The current call is ended and you resume the previous call.

- OR -

- Press the red key to end the current call.

> **Note** During the call you can hang up both calls by pressing the red key for a long time.

Talking with two contacts at the same time (3-way conference)

Options > 3-part conference

During a double call :

- Press **Options**.
- Choose the option **3-part conference** using the ▲ or ▼ keys.
- Press **Select**.
- You can then talk with the 2 contacts at the same time and " **3-part conference**" is displayed on the screen.

- To end the conference call, press the key.

Making a second call

Options > Second call

During a conversation :

- Press **Options**.
- Choose the option **Second call** using the ▲ or ▼ keys.
- Dial the number using the keypad and press **Call**..

- OR -

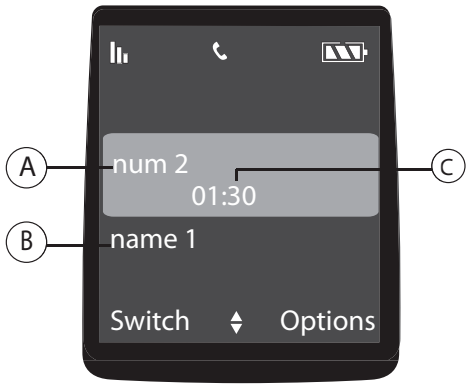
- Select the number for the person you want to call in the phonebook by pressing , and then press .

The second called number appears on the screen.

A : the number and/or name of the current call.

B : the number and/or the name of the waiting call.

C : the call time.



Transferring calls

During a call, you can transfer it to another handset. This function can be used as long as two handsets have been registered to the same base.

Options > Intercom

UNANNOUNCED TRANSFER

This function allows you to transfer the current call directly to another device.

Steps	Calling handset	Called handset
1	Press **Options**.	
2	Choose the option **Intercom**.	
3	Press **Select**.	
4	Select the handset (or all handsets) to call.	
5	Press **Call**.	
6		Rings: internal call.
7	Press **Trans.**.	
8	Hangs up automatically.	Rings: external call. Take the call.

Note At the 5th step you can cancel the transfer of the call.
To do this, select **Cancel** and then validate.

ANNOUNCED TRANSFER

This function allows you to transfer the current call to another device once it has been picked up.

Steps	Calling handset	Called handset
1	Press **Options**.	
2	Choose the option **Intercom**.	
3	Press **Select**.	
4	Select the handset (or all handsets) to call.	
5	Press **Call**.	
6		Rings : internal call.
7		Press the key to accept the internal call.
8	The external call is put on hold.	
9	Press **Trans.**.	
10	Hangs up automatically. The external call is transferred.	Communicating with the external caller.

Dual incoming call management can also be done via the option **Press R** :
Options > **Press R**

- Accepting a second incoming call (unknown call) : **Press R**.
- Making a second call during communication : **Press R** + recipient number.
- Switching from one call to the other : **Press R +** 2.
- Ending a call and switching to the call on hold : **Press R +** 1.
- Setting up a 3 way-call : **Press R +** 3.

Options during a call

You can use the following options during a call :

Activate/Deactivate loudspeaker (hands-free mode)

During the call you can activate the hands-free mode by pressing the key.

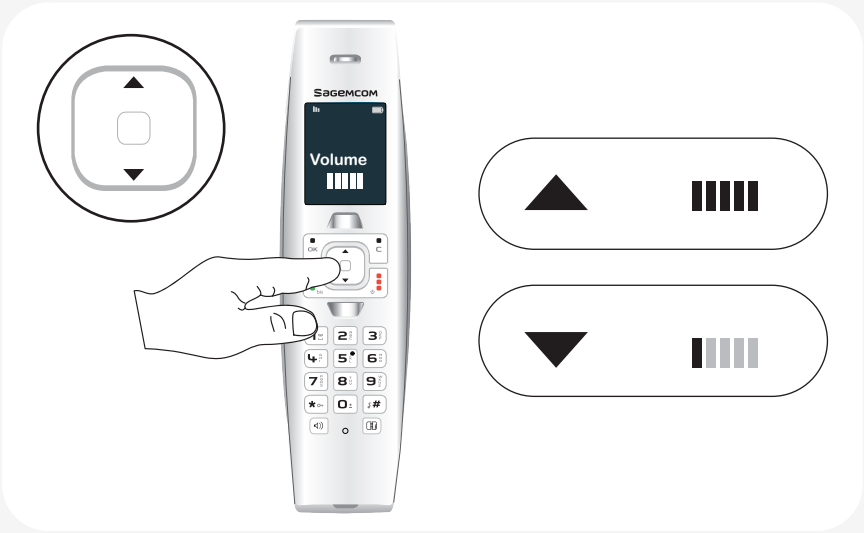
The icon is displayed on the screen.

To deactivate the hands-free mode, press the key again.

The icon disappears.

Note When your battery charging icon displays the minimum, the hands-free mode is unavailable until the next charging cycle. The hands-free mode is optimized for speaking at 50 cm from the handset.

Adjusting volume



During a call you can increase or decrease the volume of the handset by pressing the ▲ or ▼ keys on the browser.

A bar graph makes it possible to adjust the volume according to 5 levels.

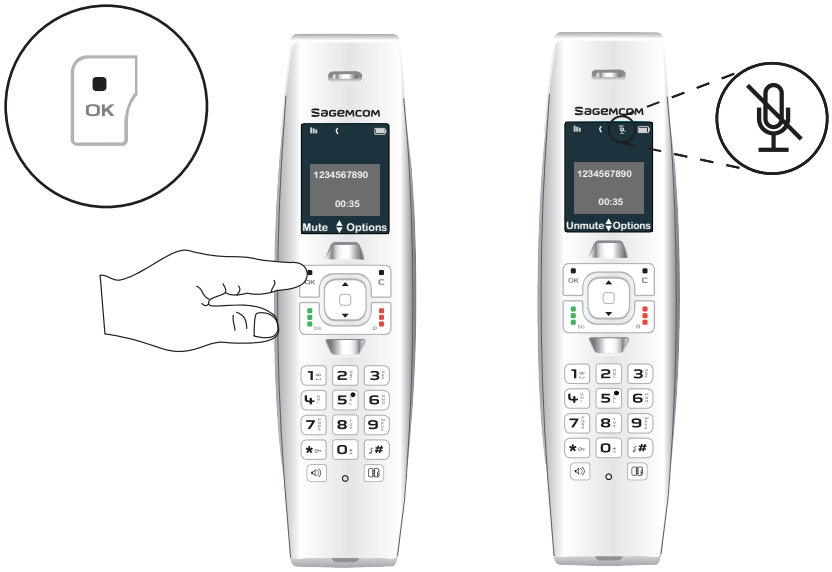
Activating the mute mode

During a call, you can switch to mute mode and your handset's microphone will be muted and your contact will no longer hear you.

TO ACTIVATE THE MUTE MODE :

- During a conversation, press **Mute**.

  The icon is displayed at the top of the screen.



TO DEACTIVATE THE MUTE MODE :

- Press **Unmute**.
  Your contact will hear you again.

KEYBOARD SHORTCUT:

During a conversation, press and hold the #♪ key to activate/deactivate the mute mode.

Using additional handsets

You can associate additional handsets with your phone. You can then make and receive outside calls or calls between these handsets.

Note You first have to pair the handsets with the base.
For further details, refer to the section "**Associating a new handset**", page 51.

Calling another handset (intercom)

1 Press **INTERN**.

2 Select the handset (or all handsets) you want to call using the ▲ or ▼ keys.

3 Press **Call**. The selected handset rings.

Intrusion

This function allows another paired handset to join a call in progress on another handset.

- You have a call in progress.
- Press and hold the green key from another paired handset.

  The handset displays **"Local conference"** and there is an externally initiated 3 way conference set-up.

Note To activate/deactivate the intrusion, refer to section "**Allow three-way communication (Intrusion)**", page 62.

Tracking your calls...

Call logs

Logs are lists of numbers or events received or sent by your phone. Depending on your phone provider and the options of your contract, the following information may be accessed in the call logs:

- the date and time of the call.
- the contact's name and/or number.

Note The numbers stored in the call log are prefixed by a symbol :

: List of incoming calls,

: List of outgoing calls,

: List of missed calls.

Displaying the list of all calls

Menu > Calls

- Press **Select**.
- Select All calls, then press **Select**.
- The last call is displayed with its date and time, its status (incoming, outgoing, missed), name and/or number.
- Scroll through the numbers stored in the list using the ▲ or ▼ keys.
- Select the call you wish to view and press **Details**.
- The following information is displayed :
  - the call status (incoming/outgoing/missed),
  - the contact's name,
  - the contact's number,
  - the call date,
  - the call time.
- Press **Back** to return to the previous menu.

Viewing the received or dialed call log

Note Unknown calls are included in the received call log.

Menu > Calls

- Press **Select**.
- Select Incoming calls, (or Outgoings calls) then press **Select**.
- The last received call (or dialed number) is then displayed first.
- The other calls are displayed using the keys ▲ or ▼.
- Select the call you wish to view and press **Details**.
- The following information is displayed :
  - the call status (incoming/outgoing/missed),
  - the contact's name,
  - the contact's number,
  - the call date,
  - the call time.

Consulting the missed call log

The icon is displayed if there are one or more new missed calls which have not been reviewed yet.

> **Note** Once the missed call log has been viewed, the icon disappears from all handsets.

Menu > Calls

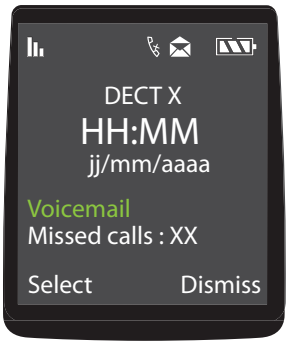
- Press **Select**.
- Select Missed calls, then press **Select**.
- The latest missed call is displayed.
- Scroll through the numbers stored in the list using the ▲ or ▼ keys.
- Select the call you wish to view and press on **Details**.
- The following information is displayed :
  - the call status (received/sent/missed),
  - the contact's name,
  - the contact's number,
  - the call date,
  - the call time.
- Press **Back** to return to the previous menu.

The events log

Note The icon is displayed if there is one or more voice mail messages.

Checking new events

A summary screen for the number of events that occurred in your absence is displayed :



- the operator messages,
- the number of missed calls.

Menu > Calls

- Press **Select**.
- Select Events then press **Select**.
- Select Missed or Voicemail using the keys ▲ or ▼ and press **Details**. The event appears on the screen.

Managing incoming or outgoing calls

Menu > Calls

- Press **Select**.
- Select All calls or Outgoings calls or Incoming calls or Missed calls then press **Select**.
- The list of calls (incoming/outgoing/missed) is displayed.
- Select the desired call and press **Details**.
- Press **Options** for the actions you can perform :
  - Call : call the displayed number,
  - Delete : delete the stored number,
  - Store : save the number in your phonebook,
  - Delete all : delete all the numbers in the list.

Manage your contacts...

Use the phonebook

You can save up to 250 entries (24 digits and 16 characters) in the phonebook.
You can also directly access the list of phonebook entries using the key.
When browsing through the phonebook, the handset displays in the right top corner the number of the current entry and the total number of available entries.

Create an entry

Menu > Phonebook

- Press **Select**.
- Select Add and press **Select**.
- Specify the required information by confirming at each step. To move between the input fields, use ▲ and ▼ keys.
- **Last name** : enter your contact's name,
- **First name** : enter your contact's first name,
- **Number** : enter the phone number(s) in the corresponding box (Home, Mobile and Work).
- Select from one of the 6 available ring tones using the OK or C keys to uniquely identify this contact.
- After making the settings, select **Save changes ?** using the ▲ or ▼ keys and press **Store**.

Note — To enter a letter, press and hold the required key until the letter is displayed on the screen or press the related key quickly unitl the character required is shown.

Call a contact from the phonebook

Menu > Phonebook

- Press **Select**.
- Select List or Search and press **Select**.
- Select an entry and press **Options**.
- Select Call and press **Select**.

Changing an entry

Menu > Phonebook

- Press **Select**.
- Select List or Search and press **Select**.
- Select an entry and press **Options**.
- Select Edit and press **Select**.
- Change the last name, first name and/or phone number by deleting characters using the C key and/or the ring tone.
- After making the settings, select **Save changes ?** using the ▲ or ▼ keys and press **Store**.

Deleting an entry

Menu > Phonebook

- Press **Select**.
- Select List or Search and press **Select**.
- Select an entry and press **Options**.
- Select Delete and press **Select**.
- For the question **Delete ?**, press **Yes** OK to confirm the deletion of the entry.

Search for an entry

Menu > Phonebook

- Press **Select**.
- Select Search and press **Select**.
- To look up a **Last name**, enter the first letter of the name, the entire name, or part of the name and press **Select**.
- Once the list is displayed, you can also directly enter the first few letters of the name sought.

Delete all the entries

Menu > Phonebook

- Press **Select**.
- Select Delete all and press **Select**.
- For the question **Delete all ?**, press **Yes** to confirm the deletion of all entries.

Speed dialing

This function allows you to assign a keyboard shortcut to a contact in your phonebook.

> Note To call your contact, press and hold the key assigned to the number and the number is automatically dialed.

Menu > Phonebook

- Press **Select**.
- Select Speed dialing and press **Select**.
- Using the keys ▲ or ▼, select the number of the key to which you want to link your contact contact (0 ~ 9).
- Press **Edit**.
- Select Edit and press **Select**.
- Press **Phonebook**, select the contact you want to assign a keypad shortcut. Press **Select**.
- You can also directly enter the number of your choice.
- Once the number is entered, press **Select**.
  To exit the menu, press **Back** 3 times in succession.

Answering machine...

Note	When your answering machine's memory is full, the answering machine turns off. You have to read your messages and delete some to free up memory space. The recording capacity of your handset is 40 minutes. The maximum duration of each message is 2 minutes.

Activating/Deactivating the answering machine

When the answering machine is activated, the icon is displayed.

Menu > Ans. machine

- Press **Select**.
- Select On/Off using the ▲ or ▼ keys and press **Select**.
- Select "On" or "Off" using the ▲ or ▼ keys to activate or deactivate your answering machine then press **Select**.
  The action is confirmed by the "**OK**" indication.

Answering machine announcements

Note	If you have not saved a personal announcement, the answering machine will automatically use the pre-recorded announcement in the specific language of your country.

Choosing your default announcement

Menu > Ans. machine

- Press **Select**.
- Select Outgoing msg. using the ▲ or ▼ keys and press **Select**.
- Select the language to be used with the keys ▲ or ▼ keys and press **Select**.
- Select Select using the ▲ or ▼ keys and press **Select**.
  The action is confirmed by the "**OK**" indication.

Recording your personal announcement

Menu > Ans. machine

- Press **Select**.
- Select Outgoing msg. using the ▲ or ▼ keys and press **Select**.
- Select **Personal** using the ▲ or ▼ keys and press **Select**.
- Select Record using the ▲ or ▼ keys and press **Select**.
- Clearly state your announcement.
- Press **Stop**, to stop the recording of the announcement.
- The message **Save changes ?** is displayed, press **Yes** OK key.
  The recorded announcement is played.

If you make a mistake while recording the message, repeat the operations described above until you are satisfied with your message.

Note	The recording of a new message will automatically replace the previous message.

Listening to your personal announcement

Menu > Ans. machine

- Press **Select**.
- Select Outgoing msg. using the ▲ or ▼ keys and press **Select**.
- Select **Personal** using the ▲ or ▼ keys and press **Select**.
- Select Play using the ▲ or ▼ keys and press **Select**.
  The currently used announcement is played.
  When the personal announcement has finished, your answering machine returns to the previous menu.

Note	You can also listen to the default announcement in the desired language from those available.

Erasing your personal announcement

Menu > Ans. machine

- Press **Select**.
- Select Outgoing msg. using the ▲ or ▼ keys and press **Select**.
- Select **Personal** using the ▲ or ▼ keys and press **Select**.
- Select Delete using the ▲ or ▼ keys and press **Select**.
  The action is confirmed by the "**OK**" indication.

Note	If you have erased your personal message, the answering machine will use the pre-recorded message.

Messages

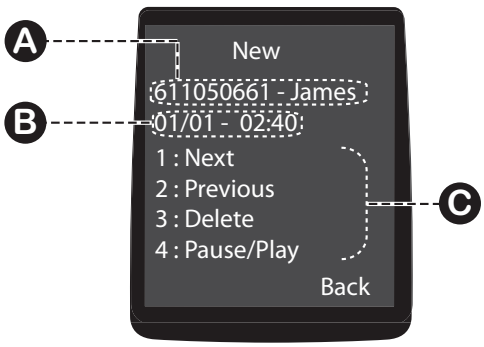
Listening to your messages

If you have received new messages, the icon lights up in green and the message "New messages : X" scrolls on the screen.

X : the number of messages on the answering machine

Menu > Ans. machine

- Press **Select**.
- Select Incoming msg. using the ▲ or ▼ keys and press **Select**.
- Select New using the ▲ or ▼ keys and press **Select**.



A : your correspondent 's name or number.

B : date time of recording of the message.

C : control keys while reading messages.

The messages are read in chronological order (from oldest to newest).

At the end of the last message, the answering machine will stop automatically.

Note	You can also listen to your old messages by selecting "Old" instead of "New".

Managing your messages

When playing back messages, press the following buttons :

Key	Action
1	Go on to the next message.
2	Return to the previous message.
3	Delete the message being read.
4	- Stop playback of the messages. - Replay the current message.

Deleting all old messages

Menu > Ans. machine

- Press **Select**.
- Select Incoming msg. using the ▲ or ▼ keys and press **Select**.
- Select Delete old using the ▲ or ▼ keys and press **Select**.
- The message "**Delete ?**" is displayed, press **Yes** OK to confirm the deletion of all old messages.

Querying your answering machine remotely

This function allows you to check your voice messages and change your answering machine settings even when you are not at home.

To remotely access your answering machine :

- Dial your phone number.
- Wait for the answering machine to come on.
- While listening to your announcement press the ✱ key and enter your remote access code.

> **Note** By default, the remote enquiry code is 0000. This code must be modified so that remote access is activated. To modify the remote enquiry code refer to paragraph “**Modify the remote enquiry code”, page 66**.

- A beep will indicate access to the answering machine, any unread messages will be automatically played back.
- At the end of playback, a new beep will sound to let you know that the answer machine is ready.
  You can perform the following operations :

Key	Action
5	Play messages / Stop playing messages
3	Delete the message being played
0	Pause/Continue playing back
*	Return to the start of the message (1 press) Return to the previous message (2 presses)
#	Go on to the next message
9	Activate / Deactivate the answering machine

Audio adjustment...

- After making the settings, select **Save changes ?** using the ▲ or ▼ keys then press **Store**.
  The action is confirmed by the "**OK**" indication.

Setting up...

The phone

Setting the date and the time

Menu > Settings

- Press **Select**.
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Select Date/Time using the ▲ or ▼ keys and press **Select**.
- The date and time setting screen is displayed, press **Edit**.
- Set the clock mode (automatic or manual) with **On/Off** key.
- Press the key ▼ and then enter the date in MM/DD/YY format.
- Press the key ▼ and then enter the time in HH:MM format.
- Confirm your entry by pressing **Select**.
- The message "**Save changes ?** " is displayed.
- Confirm by pressing OK key.

  The action is confirmed by the "**OK**" indication.

Note	If the Auto is activated (checked), it is not possible to change the date and time displayed on the handset.

Picking up and hanging up calls automatically

Menu > Settings

- Press **Select**.
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Select Auto hang/pick up using the ▲ or ▼ keys and press **Select**.
- Select Auto hangup or Auto pickup using the ▲ or ▼ keys.
- Set the status (activated or deactivated) with the **On/Off** key.
- Select "**Save changes ?** " using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

Changing the display language

Menu > Settings

- Press **Select**.
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Select Language using the ▲ or ▼ keys and press **Select**.
- Select the language to be used with the keys ▲ or ▼ and press **Select**.
- The action is confirmed by the "**OK**" indication if the choice of language is English.

Adjust the brightness

Menu > Settings

- Press **Select**.
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Select Display using the ▲ or ▼ keys and press **Select**.
- Select Brightness using the ▲ or ▼ keys and press **Select**.
- A bar graph is used to adjust the brightness according to 8 levels.
- Select the level you want using the keys ▲ or ▼.
  The brightness is directly visible on the screen.
- Press **Select**. The action is confirmed by the "**OK**" indication.

Change the screen background

This menu allows you to change your handset's screen background image.

Menu > Settings

- Press **Select** .
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Select Display using the ▲ or ▼ keys and press **Select**.
- Select Wallpaper using the ▲ or ▼ keys and press **Select**.
- Select a background screen from the ones offered using the keys ▲ or ▼.
  The image is displayed on the screen.
- Press **Select** to display the image as background.
  The action is confirmed by the "**OK**" indication.

The handset

Associating a new handset

You can associate other handsets with your base telephone. You then have to pair them so they are recognised.

FROM THE BASE :
To put your base in pairing mode :

- Press the button on the rear face of the base, until the light starts blinking.
- The base remains in pairing mode for one minute.

FROM THE HANDSET :

Case 1 : the handset displays "**Please register**".

- Press OK key.
- The handset displays : "**Put the base in registration & press OK**".
- Press **OK**.
- The message "**Search**" is displayed.
- Once the base is detected, its name is displayed on the handset screen.
- Press **Yes** to confirm.
- The message "**Registration in progress**" is displayed.
- The message "**Registered**" is displayed.
  You then automatically exit the pairing mode.

Case 2 :

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Registration then press **Select**.
- The handset displays : "**Put the base in registration & press OK**".
- Place your base in pairing mode (see previous paragraph).
- On the handset, press **OK**.
- The message "**Search**" is displayed.
- Once the base is detected, its name is displayed on the handset screen.
- Press **Yes** to confirm.
- The message "**Registration in progress**" is displayed.
- The message "**Registered**" is displayed.
  You then automatically exit the pairing mode.

Note	The standard pairing of a new handset is automatic if the default pin number (0000) has not been changed. Otherwise a message **Enter code** prompts you to enter the new PIN number. If an error occurs, the message **Registration failed** is displayed prompting you to repeat the whole procedure.

Customizing the handset's registration

You can personalise the following information :

- the name of your base,
- the registration number of your handset.

Menu > Settings

FROM THE HANDSET :

1 Press **Select**.
2 Select Advanced settings using the ▲ or ▼ keys and press **Select**.
3 Select Set handset using the ▲ or ▼ keys and press **Select**.
4 Select Person.registration then press **Select**.
5 Select the base number and confirm.
6 Enter the new base name and confirm.
7 Enter the base code.

FROM THE BASE :

8 Press the pairing button for a few seconds.
On the base: the light blinks and the base is in paired mode.
Once the handset is registered, you automatically quit pairing mode.

Defining the main base for your handset

This function allows you to specify the priority base to be used for making calls.

Note Only if you have paired the same handset on several bases.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Base priority using the ▲ or ▼ keys and press **Select**.
- Select the base that the handset should use first and press **Select**.
The action is confirmed by the "**OK**" indication.

Modifying the Voice box number

If you have subscribed to your operator's voice mail service, calls received while you are absent will be redirected to the voice mail on your telephone line.

> Note If you do not know the number of your voice mail, ask your operator for it.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Voicebox number using the ▲ or ▼ keys and press **Select**.
- Select Edit using the ▲ or ▼ keys and press **Select**.
- Deleting the Voice box number.
  The action is confirmed by the "**OK**" indication.

Deleting the Voice box number

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Voicebox number using the ▲ or ▼ keys and press **Select**.
- Select Delete using the ▲ or ▼ keys and press **Select**.
- The message "**Delete ?**" is displayed.
- Press **Yes** to confirm.
  The action is confirmed by the "**OK**" indication.

Handset version

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Handset version using the ▲ or ▼ keys and press **Select**.
  The software and EEPROM version of the SIXTY 2 handset is displayed on the screen.

Resetting the handset

When you reset your handset, all the settings are returned to their initial values (factory settings), except for the phonebook.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set handset using the ▲ or ▼ keys and press **Select**.
- Select Reset handset using the ▲ or ▼ keys and press **Select**.
- On a confirmation request "**Reset handset ?**", press **Yes**.

The base

Changing the base code

Your base station code (default setting 0000) is required to access certain security functions.This must contain 4 digits.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set base using the ▲ or ▼ keys and press **Select**.
- Select Change code using the ▲ or ▼ keys and press **Select**.
- At the "Old code" prompt, enter the old 4-digit code and then confirm by pressing **Select**.
- At the "New code" prompt, enter the new 4-digit code and then confirm by pressing **Select**.
- At the "Confirm code" prompt, enter the new code again and then confirm by pressing **Select**.
  The action is confirmed by the "**OK**" indication.

Resetting the base

When you reset your base, all the settings are returned to their initial values (factory settings), except for the phonebook.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set base using the ▲ or ▼ keys and press **Select**.
- Select Reset base using the ▲ or ▼ keys and press **Select**.
- On a confirmation request "Reset base?", press **Yes**.
  The action is confirmed by the "**OK**" indication.

Base version

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set base using the ▲ or ▼ keys and press **Select**.
- Select Base version using the ▲ or ▼ keys and press **Select**.
- The following information is displayed :
  - base software version,
  - EEPROM version,
  - base hardware version.

Activating emission free mode

There is a **Emission free mode** on your handset. It controls the radio transmission power needed according to how far away your base is.

If emission free mode is activated it means that neither base nor handset do emit any signal until it is resumed by any action from the line or handset.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set base using the ▲ or ▼ keys and press **Select**.
- Select Emission free mode using the ▲ or ▼ keys and press **Select**.
- Set the status (activated or deactivated) with the **On/Off** key.
- Select **Save changes ?** using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

Modifying the country

Country choice allows specific settings for different countries to be modified but does not change the language in the Settings.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set base using the ▲ or ▼ keys and press **Select**.
- Select Country using the ▲ or ▼ keys and press **Select**.
- A list of countries is available. Select the country in which you are using your phone and press **Select**.
  The action is confirmed by the "**OK**" indication.

The charger

> **Note** The updated settings of the charger from the menu Set charger becomes effective as soon as the handset is put back to the charger.

Modifying the display colour

With this menu you can change the display colour of your charger.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set charger using the ▲ or ▼ keys and press **Select**.
- Select Display color using the ▲ or ▼ keys and press **Select**.
- A list of colours is available. Select the desired colour then press **Select**.
  The action is confirmed by the "**OK**" indication.

Activating time display

With this menu you can activate the time display on your charger display screen.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set charger using the ▲ or ▼ keys and press **Select**.
- Select Settings using the ▲ or ▼ keys and press **Select**.
- Set the status (activated or deactivated) with the **On/Off** key.
- Select **Save changes ?** using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

The line

This menu allows you to change the settings of the lines on the base.

Important We do not recommend that you change line settings without first contacting your operator, as this may result in your phone line being disconnected.

Change the line name

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Line name using the ▲ or ▼ keys and press **Select**.
- Press Edit to change the line name using the alphanumeric keys.
- Enter your line name by successively pressing the corresponding keys, press **Select**.
  The action is confirmed by the "**OK**" indication.

Pair the handset with a line

This menu allows you to display the list of handsets paired with the line used.

> Note The activated function is marked by the symbol ☑.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Associated handset using the ▲ or ▼ keys and press **Select**.
- Enter the base code and press **Select**.
- The list of paired handsets is displayed on the screen.
- Select the desired handset using the ▲ or ▼ keys.
- Press **On/Off** key to pair/unpair the handset with/from the line used (the paired handset is then unpaired and vice versa).
- Select **Save changes ?** using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

Mask the line number

This function when activated, hides your line number.

> Note The activated function is marked by the symbol ☑.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Configuration using the ▲ or ▼ keys and press **Select**.
- Select Hide number using the ▲ or ▼ keys.
- Change the status using the key **On/Off** and press **OK**.
- Select **Save changes ?** using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

Allow three-way communication (Intrusion)

This intrusion function allows or prohibits a second handset registered on the same base to share an ongoing conversation. If the intrusion mode is activated, you will then be able to share a call in process with another handset.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Configuration using the ▲ or ▼ keys and press **Select**.
- Select Intrusion using the ▲ or ▼ keys.
- Change the status using the key **On/Off** and press **Select**.
- Select **Save changes ?** using the ▲ or ▼ keys and press **Store**.
  The action is confirmed by the "**OK**" indication.

Modifying the dialing mode

You can use the dialing system based on **voice frequency** or **pulse**.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Dial mode using the ▲ or ▼ keys and press **Select**.
- Select Edit using the ▲ or ▼ keys and press **Select**.
- Select the desired type of dialing with the keys ▲ or ▼ and press **Select**.
  The action is confirmed by the "**OK**" indication.

Note To verify the type of dialing used, select View.

Changing the flash duration

You can configure the flash duration if you use your phone abroad or on private PABX network, you may need to modify the flash duration in order to use your telephone correctly with regard to the following functionalities: outgoing 2nd call, incoming 2nd call and 3 way conference.

Please contact your service provider to obtain the correct flash duration and then modify it by doing the following.

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Set line using the ▲ or ▼ keys and press **Select**.
- Select Flash time using the ▲ or ▼ keys and press **Select**.
- Select Edit using the ▲ or ▼ keys and press **Select**.
- Select the appropriate flash duration using the ▲ or ▼ key and press **Select**. The action is confirmed by the "**OK**" indication.

Note To verify the type of flash duration used, select View.

Flash duration (MS)	Country
100	Spain, United Kingdom, Italy, Switzerland, Austria, Netherlands, Poland, Ireland, Hungary, Slovenia, Romania, Slovakia, Czech Republic and Sweden
120	Belgium
250	Germany, France, Greece, Portugal, Croatia, Serbia, Montenegro, Bosnia and Macedonia
600	Bulgaria

Call management

This menu allows you to select the line on which you want to make your outgoing call.

Managing your calls

Menu > Settings

- Press **Select**.
- Select Advanced settings using the ▲ or ▼ keys and press **Select**.
- Select Select call line using the ▲ or ▼ keys and press **Select**.
