Remote access code (—)	37
Number of rings (4 Rings)	39
Caller's recording time (3 Minutes)	39

Answering System Features

Number of rings

You can change the number of times the phone rings before the unit answers calls. You can select 2 to 6 rings, or "Auto".

"Auto": The unit answers after 2 rings when new messages have been recorded, and after 5 rings when there are no new messages. If you call your phone from outside to listen to new messages (page 38), you will know that there are no new messages when the phone rings for the 3rd time. You can then hang up without being charged for the call.

- 1  (centre of joystick) →  → **OK**
- 2 **[▲]/[▼]**: "Settings" → **OK**
- 3 **[▲]/[▼]**: "Number of Rings" → **OK**
- 4 **[▲]/[▼]**: Select the desired setting. → **OK** → **[↶⊙]**

For voice mail service subscribers

Please note the following:

- To receive messages correctly with your voice mail service, we recommend that you do not use the unit's answering system. Make sure that the answering system is turned off (page 35).
- If you would rather use the unit's answering system than the voice mail service provided by your service provider/telephone company, ask your service provider/telephone company to deactivate your voice mail service. If your service provider/telephone company cannot do this, set this unit's "Number of Rings" setting so that this unit's answering system answers calls before your service provider/telephone company's voice mail service tries to answer your calls.

It is necessary to check the number of rings required to activate the voice mail service provided by your service provider/telephone company before changing this setting.

Caller's recording time

You can change the maximum message recording time allotted to each caller, or set the unit to greet callers but not record messages.

- 1  (centre of joystick) →  → **OK**

Multi-unit Operation

Operating additional units

Additional handsets

Up to 6 handsets can be registered to a single base unit.

Important:

- The additional handset model recommended for use with this unit is noted on page 4. If other model handset is used, certain operations (handset settings, base unit settings, etc.) may not be available.
- Additional handsets will give you the freedom to, for example, have an intercom call with another handset while a third handset is on an outside call.

Additional base units

Handsets can be registered to up to 4 base units, allowing you to add additional base units and extend the area in which your handset(s) can be used. If a handset moves out of range of its base unit when "Auto" is selected on base unit selection (page 41), it will look for another base unit to make or receive calls. A base unit and the handsets it communicates with is called a "radio cell".

Note:

- Calls will be disconnected when the handset moves from one radio cell to another.

Registering a handset to a base unit

The supplied handset and base unit are pre-registered. When you purchase an additional handset, refer to the additional handset's installation manual for registration. If for some reason the handset is not registered to the base unit (for example, ∇ flashes even when the handset is near the base unit), register the handset.

- 1  (centre of joystick) →  → **OK**
- 2 \uparrow / \downarrow : "Registration" → **OK**
- 3 \uparrow / \downarrow : "Register H.set" → **OK**
- 4 \uparrow / \downarrow : Select a base unit number. → **OK**
 - This number is used by the handset as a reference only.
- 5 Proceed with the operation for your model.
 - **KX-TG8200/KX-TG8202**
Press and hold  on the base unit for about 5 seconds. (No registration tone)
 - **KX-TG8220**
Press and hold  on the base unit for about 5 seconds, until the registration tone sounds.
 - If all registered handsets start ringing, press  to stop, then repeat this step.
 - After pressing , the rest of this procedure must be completed within 90 seconds.
- 6 Wait until "Enter Base PIN" is displayed. → Enter the base unit PIN (default: "0000"). → **OK**

Multi-unit Operation

- If you forget your PIN, consult your nearest Panasonic service centre.
- When the handset has been registered successfully, Ψ will stop flashing. If the key tone is turned on (page 22), a confirmation tone will be heard.

Selecting a base unit

When "Auto" is selected, the handset will automatically use any available base unit it is registered to. When a specific base unit is selected, the handset will make and receive calls using that base unit only. If the handset is out of range of that base unit, no calls can be made.

- 1  (centre of joystick) →  → **OK**
- 2 **[▲]/[▼]**: "Select Base" → **OK**
- 3 **[▲]/[▼]**: Select the desired base unit number, or "Auto". → **OK**
 - The handset starts searching for the base unit.

Deregistering a handset

A handset can cancel its own registration (or the registration of another handset) that is stored in the base unit. This will allow the base unit to "forget" the handset.

- 1  (centre of joystick) →  → **OK**
- 2 Enter "335".
- 3 **[▲]/[▼]**: "Deregistration" → **OK**
 - The numbers of all handsets registered to the base unit are displayed.
- 4 Select the handset(s) you want to cancel, by pressing the desired handset number. → **OK**

- The selected handset number(s) will flash.
 - To cancel a selected handset number, press the number again. The number will stop flashing.
- 5 **[▲]/[▼]**: "Yes" → **OK**
 - A long beep will sound as each handset number disappears.
 - The handset does not beep when cancelling its own registration.
 - 6 **[✕]**

Cancelling a base unit

A handset can cancel a base unit that it is registered to. This allows the handset to "forget" the base unit.

- 1  (centre of joystick) →  → **OK**
- 2 **[▲]/[▼]**: "Registration" → **OK**
- 3 Enter "335".
- 4 **[▲]/[▼]**: "Cancel Base" → **OK**
- 5 Select the base unit(s) you want to cancel, by pressing the desired base unit number. → **OK**
 - The selected base unit number(s) will flash.
 - To cancel a selected base unit number, press the number again. The number will stop flashing.
- 6 **[▲]/[▼]**: "Yes" → **OK** → **[✕]**

Note:

- To register the handset to another base unit or to the same base unit again, see page 40.

Increasing the range of the base unit

You can increase the signal range of the base unit by using a DECT repeater. Please use only the Panasonic DECT repeater noted on page 4. Consult your Panasonic dealer for details.

Note:

- After turning repeater mode on or off,  will flash on the handset momentarily. This is normal. The handset can be used once  stops flashing.

- 1 **Handset 1:**
During an outside call, press **[INT]**.
→ Press **[2]** (desired handset number).
 - The outside call will be put on hold.
 - If there is no answer, press **[INT]** to return to the outside call.
