Frequently asked questions	
Question	Cause/solution
Why is  flashing?	<ul style="list-style-type: none"> • The handset is too far from the base unit. Move closer. • The base unit's AC adaptor is not connected. Check the connections. • You are using the handset or base unit in an area with high electrical interference. Place the base unit and use the handset away from sources of interference. • The handset is not registered to the base unit. Register it (page 7).
Why can I not make calls?	<ul style="list-style-type: none"> • The dialling mode may be set incorrectly. Change the setting (page 3).
What should I do when the handset does not turn on?	<ul style="list-style-type: none"> • Make sure the batteries are installed correctly. • Fully charge the batteries. • Clean the charge contacts and charge again.
How long is the battery operating time?	<ul style="list-style-type: none"> • When you are using fully-charged Ni-MH batteries (supplied batteries); In continuous use: 17 hours max. Not in use (standby): 150 hours max. • It is normal for batteries not to reach full capacity at the initial charge. Maximum battery performance is reached after a few complete cycles of charge/discharge (use). • Actual battery performance depends on a combination of how often the handset is in use and how often it is not in use (standby).
Can I keep the handset on the base unit or charger when I am not using it?	<ul style="list-style-type: none"> • Even after the handset is fully charged, the handset can be left on the base unit or charger without any ill effect on the batteries.
When should I replace the batteries?	<ul style="list-style-type: none"> • If the batteries are fully charged until  is displayed, but  is displayed after a few calls, replace the batteries with new ones.
What is a PIN?	<ul style="list-style-type: none"> • The PIN is a 4-digit number that must be entered in order to change certain base unit settings. The default PIN is "0000".
