KMnet Viewer 5

KMnet Viewer 5 is KYOCERA's device management software for up to 100 devices. Offering counter readings, status feedback, remote device configuration, accounting and alerts of network devices at one central administration point, it is comprehensive yet easy to use.

FEATURE OVERVIEW

- Automated discovery of network devices
- Comprehensive display of device information (settings, counters, users, address book, logs, etc.)
- Remote configuration of device settings and properties
- Integrated device and accounting management
- Firmware upgrades for single and multiple devices
- Device status notifications (e.g. paper jam, low toner) via e-mail
- Customizable views for device groups and according to dynamic criteria (e.g. all devices with low toner)
- Map display with user defined background
- Export of device information and counter data for analysis

NEW!

- New accounting functionality
- Device management and accounting within one easy to use interface
- Enhanced security
- Multi set: Simultaneous configuration of single and multiple devices
- Firmware upgrades for FS-1920 and above
- Default views & custom views
- Easy to use interface with improved usability
