Buttons

Using M351, different keys gives users access to different phone functions.
Here are some commonly used shortcuts and methods of operation.

Power button	Briefly press this button to lock / activate the screen; Holding this button will cause a "Power Off/Restart" dialog box to pop up;
Volume keys	Increases and decreases volume;
Home button	When locked, double tap the home button to activate it; When unlocked, tap to return to the Home screen; During a call, press the Home button to return to the Home screen. The Power button can be used to hang up.

Battery

Charging the battery

M351 is equipped with built-in rechargeable battery.

Note:Do not attempt to remove the back cover to take out or repair the battery.

Use only the supplied power adapter and USB cable to charge the battery.
Do not remove the battery from the phone when charging the phone through
power adapter or automobile-used adapter.

• How to charge the phone:
1. Make sure the USB cable is placed correctly,
   and then plug the cable into the M351's micro USB
   port which is in the bottom of the phone;
2. Plug the power adapter into a power outlet with
   standard AC power applicable to the phone.

If the battery is critical, the M351 will not boot. Connect it to a power adapter, and
M351 will display the charging animation. The Locked screen would display
charging status. When the battery is full, a full green battery would be shown on
the Locked screen, and the animation stops. Disconnect the power adapter from
the power outlet, and then disconnect the M351.

Note:
1. If the battery is critical, the M351 will not boot.
   Please try booting after 5 minutes of charging.
2. It normally takes 2-3 hours to fully charge the phone.
   This can vary depending on if the phone is on, if there
   are any calls while charging, etc.
3. For safety reasons, please use the standard USB cable
   and power adapter.

Touch Screen

The main way to control the phone system is using users' fingers to operate icons, buttons, menu items, the keyboard and other items on the touch screen.
What's more, users can change the direction of the screen.

- Touch / tap
  Touch the screen gently with users' finger.
- Hold
  Use users' finger to touch and hold on
  the touch screen.
- Double-tap
  Tap the screen twice.
  In the web browser, users can swipe to browse
  fastly. users can also double tap to zoom in
  and out of the web page.

- Drag
  Touch and hold an icon, and then
  move it to a desired location.

- Quick swipe or Swipe
  Swipe users' fingers vertically or
  horizontally with quick dragging
  motion. users can switch content pages
  within an app by using this gesture.
- Pinch
  In some applications such as the Gallery
  or Browser, users can use two fingers to
  pinch and zoom in and out of photos
  and web pages.
- Rotate
  When supported, the phone automatically changes screen orientation depending
  on how users hold it. This can be turned off under "Settings" > "Display".

Firmware Upgrade

How to upgrade the firmware

1. Use the USB cable to connect the Meizu M351 with a computer, and copy the new firmware (update.bin) to the M351 root director ;
2. Safely unplug the USB and turn off the Meizu M351.

> Note:Please make sure the phone has sufficient battery,
> or it might be unable to upgrade or boot due to power failure.

3. Start the phone while simultaneously holding the "Power" button and "Volume Up" button (as pictured).
4. Wait until the "System Upgrade" appears on the screen.
5. Tap the "Start" icon to begin the upgrade process or tap the "Cancel" icon to exit upgrade mode.
   If data erasing is needed, please check "Clear Data" option before upgrading. Only the phone data (such as notes, messages, contacts) will be removed. Data on the SD card (such as music and photos) will remain intact.
6. Do not power off the device while upgrading.
7. When the upgrade is complete, M351 will automatically reboot.

* To download the latest firmware, software and drivers; please visit
  http://www.meizu.com

> Note:Emails are not backed up on Flyme. When clearing data, users will lose all users' emails.
> users can also upgrade the firmware by system-provided upgrade function; more details
> please go to "Settings" > "About phone".

Power on, off and Lock screen

Powering on

Hold down the "Power button" until the phone shortly vibrates and the "▮▮EIZ⊔" logo is displayed.

If users' SIM card on the M351 has a PIN code enabled, users will need to enter a PIN code after powering on the phone.

If users enter the wrong PIN for three times, users will need users' PUK code to unlock the device. Please contact users' network operator for users' PUK code.

Restart or powering off

To power off or restart the phone, hold down the "Power button" until the popup selection box appears, and then select "Power off" or "Restart".

More controls

Hold down the "Power button" until the popup selection box appears. Here, users find shortcut controls for silent mode, vibration, flight mode, and more.

Locking and unlocking the screen

By default, M351 will automatically lock and shutdown the screen to save battery if users do not touch it for one minute. Under its locked state, the touch screen will not respond to any operation, but users can still enjoy the music, answer the phone, etc. Press the Home button to activate the phone screen, and drag "⌃" icons upwards to designated area to unlock the screen. If a screen password has been set, users will need to enter users' unlock password at this point. Screen lock settings can be found under "Settings" > "Security" > "Set Up Screen Lock".

Home Screen

The home screen displays app icons, folders, and various widgets such as weather and information, etc. users can choose pictures to be users' home screen wallpapers.。

Home screen icons

Tap any icons to launch their respective apps.

- Browse

   Swipe the home screen to the left and right to browse users' icons list.

   Touch the "Ⓐ Ⓞ Ⓑ" scroll bar to look through all users' apps.

- Adding

   Tap the "Settings" icon on the home screen and choose "Customize" to add items on the screen.

   "Themes", "Live Wallpapers", "Wallpapers" and "Gallery Wallpapers".

   Themes: original default themes as well as themes designed and provided by third parties.

   Live Wallpapers: Tap "Live Wallpapers" >choose one> "Set Wallpaper"

   Wallpapers: Tap "Wallpapers" menu (which is provided by the system) to set a system-provided picture as standby wallpaper or home screen wallpaper.

   Gallery Wallpapers: Tap "Gallery" > "Gallery Wallpapers" > "Set Wallpaper".

   New folder

   Drag one icon to another icon, a new folder would be automatically created.

   Widgets

   Hold the screen until users see an option of "Widget", tap it and then choose the widget that users want to add. Hold the chosen widget and drag it to the wanted screen.

- Moving and deleting

   Anywhere on the Home screen users can tap and hold an icon to detach it from the icons grid, and then drag the icon to move it to any blank area. Drag the icon to the edges of the screen to jump to the previous or next Home screen. A detached icon can also be deleted or uninstalled by dragging it downwards unto the "Uninstall" or "Remove" area to delete the app or widget.

   Note：System applications cannot be uninstalled.

Notification Bar
Displays date, app notifications, signal strength, battery status and time.

Basic Operations

How to Start

When using the M351 for the first time, please follow the steps outlined below:

1. Connect the M351 to users' computer with the USB cable, which will simultaneously charge the M351.
2. Pull the notifications bar down > tap "USB Storage" control key (lights up when turned on) to turn on storage connection to users' computer;
3. Copy music, videos, photos and other files from users' computer to corresponding folders on the M351.
4. Pull the notifications bar down > tap the "USB Storage" control key (lights down when turned off) to terminate the connection to users' computer.
5. Disconnect the USB cable of the M351 and computer.
6. Start using the device.

   users can begin listening to music, watching videos and making phone calls by tapping corresponding icons to launch the apps on the Home screen.

File Transfer

Note:Please make sure the M351device is connected to the computer.

users can download music, video, photos and other files from disks and websites and then copy them to the M351 USB device. The following the example shows how to copy music to M351:

1. Select the documents users want to copy on users' compute;
2. Select [Copy] or press Ctrl + C;
3. Double-click [Computer] desktop icon to open the Computer window and double click [Removable Disk];
4. Browse to the Music folder.
5. Select [Paste] or press Ctrl + V.
6 When the files have been copied, the music files will appear in the [MEIZU M351] Music folder.
   Disconnect the device and launch the Music app to listen to music.

For the M351 to automatically recognize users' media, please place the files to their corresponding folders on the M351: copy videos to the Video folder, photos to the Photo folder, music to the Music folder, or the program of M351may not be able to recognize the files correctly. users can browse through all files in the Documents app.

Safe Removal of Disk

With an active USB connection, files can be copied between the M351 and the computer.

1. After connecting M351 to the computer, open "Removable Disk";
2. Copy the selected audios, videos, pictures and other files to the computer;
3. After saving the files, click the icon on the computer taskbar;
4. Click on the below message when it appears;
5. "Safety Remove Hardware" window will be displayed.
6. Confirm by clicking the "OK" button and then unplug the USB.

To keep users' data safe and the disk free from damage a removable disk, always safely disconnect users' hardware from users' computer. If the dialog box below is shown, it does not mean that the product is faulty. Simply wait a moment and try again.

Network Connection

Note:Make sure the SIM card has been inserted into the M351.

Setting up data connectivity

With just a few simple steps, users can unlock the M351's data networking capabilities which gives users connectivity with the world anytime, anywhere.

1. After starting the phone: go to "Settings" > "Networks" and activate the "Enable data" switch.
2. Select users' carrier or operator under "Access Point Names".
3. Under "Network mode", select "GSM/3G auto", "GSM only" or "3G only"
4. Tap the Back key ‹ to complete the setup.

When data connectivity is not needed, it is recommended to deactivate the "Enable data" switch.

Note:Before using the network, please confirm users' data consuming status or use WLAN whenever possible to avoid exceeding users' data package plan.

App Guide

Phone

Before making a call, please make sure that there is network connection.

Tap Phone icon 📞 to launch the Phone app.

Dialing a number

- Direct dialing

  Tap ⊞ to open the dial pad, then enter a number and tap 📞 to call. Use the ⌫ button to correct any mistakes. If the phone number is from a saved contact, the contact name will be displayed on the dial screen. After entering a number tap 👤 to "Add to new contact" or "Add to existing contact".

- Make a call from History

  Tap 🔍 to view recent call history list. Tap the avatars or icons on the left side can call back immediately.

Answering the phone

When there is an incoming call, the contact information of the incoming caller is displayed, together with a ringtone or vibration. Drag the 📞 icon to 📞 to answer the call, and drag it to 📞 to reject the call.

While answering the phone, users can carry out the following operations:

- Tap 👤 button to enter Contacts list and check contacts' information;
- Tap 🎤 to shutdown microphone for current call so the caller cannot hear users' voice;
- Tap ▌▌ to hold current call if possible under the current network;
- Tap ◉ to record current call as audio; users can find and play the audios in folder Files > Storage > Recorder > Call.
- Tap ✎ to save the number users just input, which can be dialed directly after users' current call;
- Tap ⊞ to activate dial pad, which can be used to input information that required by auto voice response system.
- Tap 🔊 to enable the loudspeaker;
- Tap 📞 to end the call.

Adjust the receiver volume

During a call, users can press the volume key on the left side of the phone to adjust volume of the receiver. Press up key to volume up and press the lower key to volume down.

Call holding

During a call, if there is a second incoming call, users will have the choice to hang up the current call and take the new call, hold the current call and take the new call, or reject the incoming call. This feature is only available if users' carrier supports it.

Call holding can be turned on and off from "Phone settings" > "Call holding".
If a second call is connected, the first call will be automatically put on hold.

Conference calls

Conference calls, which allow more than two people to talk at once, are also supported if supported by the carrier.
- How to establish a conference call:
    1 Start a normal phone call.
    2 When the second phone call connects, the first call will be put on hold.
    3 Tap the [Merge] button, which will initiate conference calling. If successful, multiple names will be displayed on the call screen and all three callers can hear each other.

While in a conference call, tapping the "Hold" button will put all participants on hold. Tapping the "Hold" button again will resume the call.

Making an emergency call

As long as users' phone is in a GSM service area, users can make an emergency call, even if there is no SIM card in the phone. Dial 112 (China) to make an emergency call.

> Note:A password locked or PIN locked screen can still be bypassed by tapping on the emergency call button.

To hang up, either press the Power button twice, or swipe the the top call drawer downwards. Use the volume buttons to mute an incoming call. Once connected, the in-call interface is displayed. Missed calls are displayed in a notifications box on the lock screen.

International calls

In the dial pad, tap and hold the [0] button until the "+" sign appears.
Enter the country code, area code and phone number and tap 📞.

View call log

1. Tap 🔍 to open up the call log.
2 Tap a contact on the list for detailed information including call details, phone numbers, etc.

If the phone number belongs to a contact in the contacts list, their contact information will be displayed in the call log. To clear all call history, tap on the Menu key "..." and tap the "Clear call log" button, and then confirm by tapping "OK". The call details include information on phone numbers, contact names, email addresses, group, call

records, and more. If the number does not belong to a contact, users can add it to a new contact by tapping the number and then choose "Add to New Contact" to save the number as new contact or add to existing contact.

On the call details page, users can tap the 💬 icon to send messages to the number, or users can call the number by tapping it.

Search for contacts

M351 can match the inputted letters with the Chinese and English initials of contacts' names. For example, users can type "BD" and the phone will match "Bob Dylan" (only when the contact exists).
Tap on a certain contact and then users can see the details of this contact. In the details page, users can tap 🔍 icon to send a message to the contact, or users can call him directly by tapping the number.

Contacts

users can save contact names in the M351, together with phone numbers and other related information.

- New contacts
  If a stranger calls users, emails users, or sends users a text message;
  users can save the contact information to a new contact.
- Adding new contacts
  To add a new contact, tap the phone Menu key " ... " > "New contact" button.
  Then, input related content such as name, phone number and email address.
  Tap "Add another field" for additional items. users can tap the 👤 icon which is
  left to the typed item and choose the item tag users would like in the popup box.
- Add a contact from the dial pad
  1. Dial the number on the phone dial pad, tap on the 👤 icon, and then select
     between "Add to new contact" or "Add to existing contact".
  2. Edit the contact information, then tap "Save".
- Add or change contact display picture
  1. Tap 👤+ and select a contact.
  2. On the contact details screen, tap the Menu key "..." > "Edit" to enter
     edit mode.
  3. Tap picture area and then select between "Take photo" or "Choose photo
     from gallery".
- Deleting contacts
  Tap and select a contact. Tap "..." > "Delete", and confirm by tapping the
  "OK" button.
- Sharing contacts
  Tap 👤 , and select a contact. Tap "..." > "Share", and several sharing options
  will appear, which allow users to share contacts by "Email", "MMS",
  and "Bluetooth".

  > Note:If there is a third party app, a contact can also be shared via the apps.

Phone settings

While in the Phone app, tap the Menu key "..." > "Phone Settings".

- Contacts
  Contact accounts: set up Exchange accounts and select default account.
  Import and export contacts:
  Import contacts: Check Vcard files > "Import" ;
  Export contacts: Check groups or contacts > "Export"
  SIM contacts: users can view, import and delete contacts that saved in
  users' SIM card.
- Call
  Vibrates when get through: Upon activation, the phone will shortly vibrate
  when an outgoing call gets answered by the other party.
  Prefix/IP number: Set up a prefix/IP number and when long hold the calling
  key, the prefix will add to the number automatically.
- Incoming call
  Block calls from strangers: When this function is turned on, calls from
  strangers except International calls will be blocked.
  Message recording: When there is no one to answer users' phone, the phone
  will automatically answer the call and record the voice message; there are
  three options: "Disabled" , "Record when no answering" and
  "Record for all incoming calls"

  > Note:This service will only charge the caller for normal calling fees.

- Spam call filter: Interception records will be saved in the Spam Call list. It can
  also synchronize with Flyme public blacklist or add a number on User blacklist.
- Call forwarding: Call forwarding enables users forward all users' incoming calls
  to other telephone number. This feature requires network support; please
  contact users' network operator for more information. Call forwarding has the
  following options:
    1.Always forward: Forward all calls.
    2.Forward if busy: Forward calls when on the line.
    3.Forward if unanswered: Forward unanswered calls.
    4.Forward if unreachable: Forward calls when not in service.
    5.Disable all call: Cancel all call forwarding settings.
- Call waiting: To notify incoming calls when users are on the line. This function
  needs network support.
- Other settings
  When Auto Call Record function is turned on, the system automatically records
  all calls without opening the calling interface.
  Caller ID: Display users' number on other people's screen as operator's default
  network settings when make calls.

Messaging

The Messaging app makes it easy and intuitive for users to send and receive text messages. Messaging app can be launched by tapping on the Messaging icon 💬 on the Home screen.

Creating and viewing messages
1. Tap the 📝 button to start writing a new text message. Enter the recipient number directly, or tap the right ➕ button to browse the contact list. users can also send a message from the Home screen 🟢 > 👤 > contacts list, select contact > tap the 💬 button to the right of the phone number;
2. Type users' message, then tap "Send";

> Contacts: When the number matches those of existing contacts, a drop-down menu will be displayed for users' selection.

Replying
1. In the dialog list, tap on any one to open the dialog;
2. Tap the text input zone at the bottom of the screen, type in users' reply; then tap ▶ to send.

Forwarding
1. In the dialog list, tap on any one to open the dialog;
2. Tap and hold a message;
3. Tap "Forward" from the popup box;
4. Enter the recipient, then ▶ to send.

Deleting a dialog
1. In the dialog list, tap the dot that is right to the dialog which users want to delete, check it (or check as many as users want);
2. Tap the 🗑 button to delete;
3. In the confirmation box, tap "OK".

Deleting a certain message within a dialog
1. In the dialog list, tap on any one to open the dialog;
2. Tap and hold the message which users want to delete;
3. Tap "Delete".

Smilies and MMS

    1. Tap the icon to create new a message;

    2. Tap the button and choose the content which users want to add.
      users can tap icon to switch to smilie keyboard. Smilies and contacts information
      (text form) will be delivered as short messages, while contacts Vcard, photos, audios
      and videos will be delivered as MMS. The MMS attachment size cannot exceed 300 Kb.
      Sending a MMS requires corresponding carrier service and correct settings.

    3. Tap to send.

Search

    1. Tap "…" under the dialog list;

    2. Enter the search term users are looking for in the search dialog box.

    3. Relevant information will be displayed in the results list automatically.

Settings

Tap the Menu key "…" under the dialog list to set up the following items:

- Display

Notifications: When activated, message content will be displayed
                           in the notifications bar when users receive a new message.

Delivery report: When activated, a delivery report will be requested for
                           all messages sent. It is a service provided by the carrier
                           which enables the system to show whether the message
                           is successfully delivered.

Allows screen rotation: Allows horizontal screen when it is selected.

- Advanced Settings

Spam filter: Filtered messages will automatically be moved to trash. It is
                           also possible to sync with the Flyme public spam list to block
                           numbers reported by other users. Smart filter is available
                           which can spam the messages by judging through the
                           contents;

Roaming auto-retrieve: Automatically download message data when roaming.

- Other settings

Flyme messages: When activated, users can receive Flyme messages for free;

SMS center: Set the number of the SMS center.

Browser

M351 makes users' web browsing experience more convenient and exciting.
To start surfing, tap the Browser icon 🌐 on the Home screen, or type users' desired URL in the Quick Search Box.

Launching through the Browser icon
Tap the Browser icon to launch the browser and load the home page in full screen mode.

- Open a web page
  1. Tap the top URL input box.
  2. Enter the desired URL.
  3. Tap the "Go" button on keyboard.

- Refresh the current page
  Tap on the ↻ button at the bottom of the screen;
  The page will reload to display the latest content.

- New window
  Tap on the number key 6 at the bottom of the screen and the number key will become a ✚ button, tap on the ✚ button again.

- View favorites
  Tap the 🔖 at the bottom of the screen to view users' favorites.

- Close the current page
  Tap on the number key 6 at the bottom of the screen, tap the upper area of the page or drag the thumbnail upwards.

- Close the current page
  Tap on the number key 6 at the bottom of the screen and then drag any thumbnail downwards.

- Set users' home page
  Whenever users open a new browser, users' home page will be loaded.
  1. Tap the Menu key "..." > "Settings" > "Set home page".
  2. Choose "Custom" and enter the desired home page URL, then tap "OK".

  To set the home page as a blank page, simply edit the homepage but leave the URL blank. This allows new browser windows to open faster. It is also possible to set the current page or website from Favorites as the home page.

Navigating a web page

As the mobile screen size is limited, users can use zooming or scrolling to help users better navigate the content.

- Scroll
  To scroll, slide users' finger on the screen.

- Zoom in or out
  Finger on the screen, double-click zoom to view the content page, and double-click again to reduce the view.

- Copying page content
  1. Navigate to the content users want.
  2. Tap and hold on the content.
  3. Use the text selection arrows to select users' desired content, and then tap "Copy".

Web browsing

The Browser allows users to open a link as in computer web browser.

- Opening a link
  Tap a link to open its page.

- Navigating back on the opened page
  Tapping the back key ‹ .

- Address and phone number of quick links
  The browser can set up quick links directly for some of the phone number, address and similar information (which already have links).

- Clear all cookie data: Tap "Clear all cookie data" to delete all cookies.
- More settings
  Enable Flash: "Always", "On demand" or "Off".
  Load images: Switching this off will stop the Browser from loading pictures,
                             which increases the load speed of websites.
  Accept cookies: Accept cookies, which are needed for websites to recognize
                             users, for instance, auto-login features.
  Enable JavaScript: Turn JavaScript on and off .
  Block pop-up windows: Prevents pop-up window from being automatically opened.
  Open pages in overview: Overview mode shows the entire page, giving users an
                             overview over its content.
  Search result preloading: To pre-loaded search results, choose from "Never",
                             "Only on Wi-Fi" and "Always".
  Text encoding: users can change the coding standard of the website text
                             on the Browser; users have the following options:
                             Latin-1(ISO-8859-1), Unicode (UTF-8), Chinese (GBK),
                             Chinese (Big5), Japanese (ISO-2022-JP), Japanese (SHIFT_JIS),
                             Japanese (EUC-JP) and Korean (EUC-KR).
  Show security warnings: A security warning appears when security problems such as
                             outdated or invalid certificates arise.
  Enable location: Allow websites to request users' location.
  Website settings: Manage advanced settings of websites.
  Reset to default: Restore all browser settings to their original state.

Email

M351 adopts standard mail system which enables users read and send emails via Email app. It's configured to work with most major email providers.
On the Home screen, tap the "Email" icon to launch the app.

Open Email and account page
users can read users' mails in Email apps.

- Open Email app
  Tap the Email icon on home screen; if users are using this app for the first time, users need to go through a tour which will lead users to set up users' Email account; after setting up, the app will show users' inbox.
- Open account page
  Tap Email app icon to enter inbox.
  The recent Emails will be displayed, while the earlier Emails need to be downloaded by sliding down the screen.

Mails
users can read and write mails in "Inbox" or any other folders of valid account.
Slide right the screen to see a side bar on the left screen, users can tap on the folders such as "Sent", "Trash", "Notes", etc.
On the page of mail list, users can tap on the dot on the right side to select mails and to move the mails to another folder.
    Tap ↻ to update
    Tap ▨ to write a new mail.
    Tap 🔍 to search.

Replying to emails
users can reply, forward, delete or manage messages users receive.
- Reply or forward
  Enter the Inbox and tap on a title to see the mail content
   ↩ Reply ;
   ↩ Reply all ;
   ↱ Forward ;

- Mark it as a new (or read) mail
  When reading a mail, tap "..." > "Mark unread".

- Delete a mail
  users can delete mails by tapping the dot right to the mail title and then
  tap⬚ to delete, or users can tap "..." > "Delete" after reading the mail.

- Starred mails
  On the mail list page, users can tap on the dot right to the mail title >
  "Add star" to mark the mail. users can slide right the screen to activate
  side bar and tap "Starred" to see all users' starred mails.
  This setting will be synchronized in email server.

On most types of accounts, deleted messages are stored in a folder. If users deleted
emails by accident, it is often possible to recover them. In the Email app, slide right
the screen to activate side bar, and then open the "Trash" folder.

Composing and sending email
users can send emails to individual contacts or groups.
1. In the Email app, tap the ⬚ button to start writing;
2. Enter the recipient's email address; when there is a suggested address
   from existing contacts users can touch it to add to recipient;
3. Enter the desired "CC / BCC" addresses. Tap the "CC / BCC" button reveal
   two fields, for "CC" and "BCC" respectively.
4. Hold "Recipient" or "CC/BCC", the address would be movable, users
   can drag the address to the column users want;
5. Type users' subject;
6. Type users' message.
7. Tap "Attach" to add files to the email. Tap ⬚ to add photos from Gallery,
   Tap ▷ to send.
8. When ready, send the email by using the "Send" button.
   If users are not ready to send, tap the Back key. The email will be
   automatically saved to Drafts.

- Account folders
  Each account has Inbox, Drafts, Outbox, Sent, Trash and Spam folders.
  Depending on users' email provider, users might have additional folders.

Adding and editing email accounts

The first time users open Email, users are prompted to set up an email account. After this, users can configure the Email app to receive and send email from other accounts. Accounts are configured from the Email settings screen.

The email setup wizard can help users set up most popular email providers, including those based on POP3, IMAP and SMTP.
users can also configure an Exchange account.

- Add account
    1. Open the Email app.
    2. Tap the phone's Menu key "..." > "Settings" > "Add account"
       In the setup process, enter users' email address, password, and name (optional). If users have multiple email addresses set up, users can select a default account for outgoing email.
    3. Select the appropriate account type and tap "Done".
       Settings can vary depending on the email provider. If users are unsure of the settings, please contact users' email service provider.

    If the setup wizard requires additional information, users will be prompted to enter more details after tapping "Done". Contact users' email service provider if users are unsure of the required settings.
    Once set up, emails will be synced from users' mail server, and users can start using the new account to send and receive messages.

E-mail account settings

Tap on the phone Menu key "..." > "Settings"> select a mail account.

- Synchronization Frequency
   Select Sync → select synchronization frequency: "Three days", "One week", "One Month" or "All".
- Incoming settings
   Configure the incoming server of users' email account.
- Mailbox setting
   Add, rename or delete an account, or configure the mail push.
- Signature
   users' signature will be included at the end of all emails.

- Remove account
    1. Select the account which users want to remove and tap 🗑 .
    2. Tap "OK".

Default account
Select the default account from which to send emails from.

Tap the ⏸ button and the recording will be paused, tap again to continue recording.

Rename recording
Select the record > tap [✏] > Input file name > Save

Share a recording
When the recording operation is complete, check the recording by its selection bullet > tap ⤴ to share, then choose between sharing via "Mail", "MMS" or "Bluetooth".

Delete recording
Select the record > tap 🗑 to delete the recording.

Play recording
Tap on a recording in the list for direct playback.
Tap + , to record time of playing which can be resumed if the playing get interrupted.

Calculator

The calculator app lets you do basic operations, such as addition, subtraction, multiplication, and division. Tap the Calculator icon on the Home screen to launch the app.

   c   : Clear data.

   π   : Tap to switch to scientific calculator; tap again to switch back'

   ⭦   : Tap to make the calculator floated above the home screen;
                tap again to switch to the original mode.

Settings

You can change settings on the M351 and customize ringtones, date and time, and much more. Tap the Settings icon on the Home screen to launch.

Customize
You can add widget to the screen such as widgets, themes, live wallpapers, gallery wallpapers or system wallpapers.

Theme:	Both from the system and third parties.
Live wallpapers:	Tap "Live wallpapers" menu > "Set"
Wallpapers:	Tap "Wallpaper" menu which is a built-in item of the system, can set the system picture as standby screen and home screen;
Gallery wallpapers:	Tap "Gallery wallpapers" > "Set".

Networks

- **Portable hotspot:** Set up and manage wireless portable hotspots. Portable hotspots shares your mobile data connection through WLAN.
- **Data enabled:** Enable data access to connect to the internet.
- **VPN:** Set up and manage VPNs.
- **Data limits:** Users can define the limits of data;
- **APN:** Set up carrier access point names to enable data.
- **Network mode:** Automatically switches the network mode between "GSM/3G auto", "GSM only" or "3G only" depending on connectivity
- **Data roaming:** When enabled, data access will be available when roaming.
- **Prioritize calls:** Only for GSM networks.
- **Network operator:** Manage network operator settings. If you select a network manually, when there is no available network, the notification bar will show "No Service" and under that circumstance you cannot use network.
- **PPPoE:** Set up PPPoE username and password setting.

WLAN

Enable to turn on the wireless radios.

- Connect to network: user-defined network which can configure name
                          and security (WEP, WPA/WPA2 PSK, 802.1x EAP, WAPI PSK);
- Connect via WPS: Connect to nearby WPS networks.
- WLAN Direct: Search for WLAN Direct network;
- Advanced settings

Bluetooth

M351uses Bluetooth technology to wirelessly connect to other Bluetooth devices and exchange data. When turned on, you can edit the "Device name" that other devices will see. When "Discoverable" is turned on, other Bluetooth devices nearby can find the M351. If "Discoverable is turned off, other Bluetooth devices cannot find the M351.

Note:The phone might be incompatible with other devices, and the Bluetooth connections
       will be affected by the environment.

Display

- Display

  Sleep: Set the amount of time before the phone goes to sleep.
                            Sleep time is not recommended to be set to too long,
                            as it uses battery and may damage the screen.
  Font size: Set the font size for calling history, contacts, messages
                            and etc.
  Battery percentage: When turned on, the percentage of battery remained
                            will be shown on the notification bar.
- Brightness

  Auto brightness: Automatically adjust screen brightness according to
                            the environment.
  Screen brightness: Use the slider to adjust screen brightness. Higher
                            brightness uses more battery.
  Light keys: Adjust the brightness of the light keys.
- Output

  Wireless display: Turn on/off.

Sound

- Sound

  Silent mode: In silent mode, all sounds are muted except for when when
                            the alarm starts.
  Vibration: The Vibration switch allows you to turn the phone vibration
                            on or off.
  Fade-in: The ringtone gradually adjusts the volume from low to high.
  Volume: You can set the ringtone volume by dragging the volume
                            slider.

- Ringtone and notification
  Phone ringtone: Set the phone ringtone
  Message tone: Set the message and tone
  New email tone: Set the new email and message tone
  Calendar alert tone: Set the alert tone for calendar
  Notification tone: Set the notification tone

- Feedback
  Dialpad touch tones: Play sounds when using the dialpad
  Keyboard sound: Play sounds as you type on the virtual keyboard
  Screen lock sound: Play a sound when unlocking the screen
  Camera shutter sound: Play a sound when taking pictures

Apps control
        Turn on/off the apps' notification.
Security & location
        Screen unlock   Set up screen lock: Prevent the phone being used
                                   without permission.
                                   1. Enter at least four digits to create a password;
                                   2. Enter the number again to confirm;
                                   3. Tap "OK".
                                   To remove unlock password, please turn off the
                                   password lock.If you want to change the password,
                                   please tap "Reset".Enable the screen lock will need
                                   correct password to get to Home screen.Users can
                                   define their own password and also can activate
                                   Guest mode.
- Location services
  Turned on location services: record locations information.
- Use GPS satellites:
  Turning on GPS will give you a location precise to street level. GPS accuracy
  depends on actual sky conditions and other factors.Use wireless networks
  When enabled, WLAN networks are used to improve location accuracy.
- Permissions and credentials
  Allow installation of apps of unknown sources:
        when turned on, unknown sources apps can be installed;
  Device administrators:
        View or deactivate device administrators.
  Install certificates from disk:
        Install encrypted certification from disk.
  Clear credentials:
        Erase all credentials and reset password.

- Join user experience improving program
  The statistics will only be used to improve the product. Users' private information will not be leaked.

Language & time

- Select language   Chinese(traditional), Chinese(simplified), English, etc.
- Keyboard   Set up automatic capitalization, update dictionary and select which input languages to use.

- Date & time
  Automatic: Automatically request date and time settings from carrier.
  Set Date: If "Automatic" is disabled, tap to manually set the system date.
  Select the time zone: If "Automatic" is disabled, tap to manually set the time zone.
  Set time: If "Automatic" is disabled, tap to manually set the time.
  Use 24-hour format: Use 24-hour time format instead of AM/PM.

Accessibili

  Haptic feedback: Vibrate phone when using the Home button.
  LED notifications: When turned on, the phone's light keys will blink when there are missed calls, unread emails and messages or other notifications.
  USB quick charge: When turned on, the speed of USB charging becomes faster.
  Power saving mode: Save power when turned on.
  Proximity sensor calibration: Calibrate the proximity sensor.

- Developer options
  USB debugging: Enable debugging mode when USB is connected;
  Stay awake: Screen will never sleep while charging;
  Allow mock locations: When turned on, the phone will allow developers to mock locations for tests.

- More settings
  Third party app installation path:
       When turned on, all third party app temp files will be installed to the directory VirtualSD;
  Set the scope of the back gesture:
       drag the scope slider to set the scope of back gesture.

Accounts

Add Flyme account and other accounts.

About phone

Includes device name, storage, information about system updates (OTA updates), status, legal information, model, system version, baseband version, hardware version, Kernel version, serial number and IMEI.

Other

Troubleshooting

In case of problems, please refer to this guide. If the problems persist, contact your dealer or visit our website. You can find frequently asked questions and a community forum on our official English website at http://en.meizu.com.

Entering PIN
Enter your SIM card PIN code. If you do not know the code, contact your carrier for information.

Entering PUK
After entering the PIN code incorrectly three times, your SIM card will be locked. To unlock, you must enter the PUK code.

Unable to send messages
Please check that the network signal is normal.

No SIM card inserted
Confirm SIM card is properly inserted. Check that the SIM card is working properly as it may be defective or faulty. If so, contact your carrier for a replacement.

Out of service or network failure
Check the signal strength. If there is no network signal, you may be in a network blind spot. Move to another spot to regain signal.

Poor sound quality, echo or noise during conversation
Hang up and dial again.

Short battery life
Where the signal is weak, the phone will constantly be looking for signal, which drains the battery. When you do not need the phone function, you can turn the phone radio off. If the battery has been used for too long, battery life will deteriorate, and battery should be replaced.

Phone does not boot
Check the battery status.

Care tips

In order to improve mobile performance, reduce the radio emission, reduce battery power consumption and ensure safe operation, please observe the following instructions:

How to correctly use the phone:

1 Keep the phone and parts and accessories out of children's reach.

2 Keep the phone dry and in a ventilated environment when charging. Do not use water, chemicals or cleaning solvents to clean the phone. Also, avoid rain, moisture and liquids that contain minerals that corrode electronic circuit boards.

3 Do not attempt unauthorized disassembly of the phone. If you have questions, please contact Meizu or a local Meizu store.

4 Do not store the device in extreme temperatures as it can shorten the life of electronic devices and damage the battery. Recommended use environment is between -10 and 5℃.

5 Do not drop, knock or strongly shake the mobile phone, as it may result in damage to the internal circuit board.

6 If dropped in water water, make sure to turn off the mobile and send it to the local Meizu Certified Store immediately for repair. Do not attempt to dry it by using any heating equipment such as dryers, microwave ovens, etc.

7 Do not attempt to repair any product at home. If the phone is not working, consult Meizu for after-sales service.

8 Prolonged phone calls, web surfing sessions and gaming may result in the phone warming up, especially when charging. This is normal phenomenon among modern smartphones.

9 The phone has a built-in antenna. Do not damage or perform unauthorized modifications to the antenna, which may result in reduced equipment efficiency and increased SAR values exceeding the recommended range.

10 Do not place heavy objects on, or press hard on the phone, to avoid damage to the phone or its touch screen display.
Mobile security and backup:

The device supports internet connectivity. Like computers, it may be exposed to viruses, malicious information or applications, and other harmful content. Please only open messages, accept connectivity requests, download content and accept installation requests from reliable sources. Please back up important information regularly to prevent the loss of data.

Battery

1. Do not attempt to open the case for the removal or repair mobile phone battery. This product contains a lithium-ion polymer battery. Incorrect installation of battery may lead to fire danger or combustion. Do not disassemble the battery, its external short circuit contacts, expose the battery to extreme temperature (outside of the recommended -10 º C to 55 º C range), and do not dispose of batteries in a fire as general waste.
2. Please keep the battery and device dry and away from water or other liquids, to avoid short circuiting the device.

* The battery standard: GB/T 18287-2000, limited charge voltage: 4.3V

Please follow the relevant laws and regulations, and do not use the phone in the following environments:

1. Gas stations, chemical storage warehouses, environments containing flammable gas or other chemicals.
2. Hospital operating rooms, emergency rooms, intensive care units and other places. In order to avoid interference with medical devices work, do not use phone.
3. When in an aircraft, follow the aviation safety requirements and turn off your phone when asked to.
4. To protect you and other people's safety while driving, do not use the phone.
5. Do not use phone outdoors during a lightning storm to avoid accidents.
6. When charging the phone, do not use the phone close to your face when calling.
7. Follow any other laws governing mobile phone usage.

Accessory caution

1. Place all accessories (such as SIM or USIM card, power adapter, etc.) out of children's reach to avoid choking hazards.
2. As the mobile phone accessories are not water-resistant, keep all parts dry.
3. When the detaching the power cord of any accessory, pull the plug and not the cord.

Traffic Safety

According to research, texting or talking on the phone while driving significantly increases the fatality risk. Please follow below instructions:

1. If you want to use the phone in the car, use a hands-free device.
2. Make sure your mobile phone and hands-free device do not hinder any vehicle airbags or other safety equipment.

Radio wave radiation safety precautions
1. Avoid using the device in the vicinity of metal structures
   (such as steel construction sites).
2. Avoid using the device in the vicinity of strong electromagnetic sources,
   such as microwave ovens, speakers, TV and radios.
3. Use only original manufacturer approved accessories, or those that do not
   contain any metal parts.
4. Using non-original manufacturer approved accessories may violate your local
   RF exposure guidelines.

Radio wave (RF) signals
The mobile phone contains a radio transceiver, where the electromagnetic radiation energy does not exceed the upper limit of Chinese regulations. These limits are part of a comprehensive set of guidelines set based on human electromagnetic energy radiation tolerance. These guidelines are set after thorough independent research and are regularly updated and reassessed. These standards include ensure that persons of any age or health status can use the devices safety.
The exposure standard for mobile phones is defined by the electromagnetic energy absorption ratio (Specific Absorption Rate, or SAR) unit of measurement. Based on this model, the maxiumum allowed SAR value is 2.0W/Kg.
The SAR value is tested in accordance with standard test procedures, such as the use of normal phone positioning, and recording the maximum output power through testing a variety of frequencies. Tthe SAR value is based on the highest measured rate, but general real life mobile use will result in SAR levels well below this maximum. Mobile phones are designed to use power flexibly, and to adjust the the power output to achieve the base station demand level. In general, the closer to the base station the mobile is, the less power it needs.

SAR information
This mobile device meets international guidelines for radio wave exposure. The maximum SAR limit is at a value of 2.0W/Kg, while the measured maximum SAR of this device is 0.823W/Kg, in line with the P.R.C. national standard GB21288-2007, "Limits for human local exposure to electromagnetic fields emitted by mobile phones".

* SAR values may vary by country, region and test environment. The use of
  accessories may result in different absorption rates.
